

# L<sup>A</sup>T<sub>E</sub>X Class for the *Association for Computing Machinery*\*

Boris Veytsman<sup>†</sup>

2021/08/29, v1.79

## Abstract

This package provides a class for typesetting publications of the Association for Computing Machinery.

3.26	End of Class	109

# 1 Introduction

The Association for Computing Machinery<sup>1</sup> is the world's largest educational and scientific computing society, which delivers resources that advance computing as a science and a profession. It was one of the early adopters of  $\TeX$  for its typesetting.

It provided several different classes for a number of journals and conference proceedings. Unfortunately during the years since these classes were written, the code was patched many times, and supporting different versions of the classes became difficult.

This package provides the uniform interface for all ACM publications. It is intended to replace all the different classes and packages and provide an up-to-date  $\LaTeX$  package.

This package uses only free  $\TeX$  packages and fonts included in  $\TeX$ Live, Mik $\TeX$  and other popular  $\TeX$  distributions. It is intended to be published in these distributions itself, which minimizes users' efforts in the installation and support of this package.

I am grateful to Michael D. Adams, Leif Andersen, Lawrence Christopher Angrave, Dirk Beyer, Andrew Black, Joachim Breitner, Benjamin Byholm, John Collins, Nils Anders Danielsson, Michael Ekstrand, Matthew Fluet, Paolo G. Giarrusso, Ben Greenman, Enrico Gregorio, Jamie Davis, Ulrike Fischer, Jason Hemann, Peter Kemp, Luis Leiva, Ben Liblit, Rholais Lii, LianTze Lim, Kuldeep S. Meel, Kai Mindermann, Frank Mittelbach, Serguei Mokhov, Ross Moore, John Owens, Joel Nider, Scott Pakin, Tobias Pape, Henning Pohl, Philip Quinn, Mathias Rav, Andreas Reichinger, Matteo Riondato, Craig Rodkin, Bernard Rous, Feras Saad, Kerry A. Seitz, Jr., David Shamma, Gabriel Scherer, Kartik Singhal, Christoph Sommer, Stephen Spencer, Shin Hwei Tan, Daniel Thomas, Shari Trewin, Zack Weinberg, John Wickerson and many others for their invaluable help.

The development version of the package is available at <https://github.com/borisveytsman/acmart>.

## 2 User's guide

This class uses many commands and customizatopn options, so it might appear intimidating for a casual user. Do not panic! Many of these commands and options can be safely left with their default values or the values recommended by your conference or journal editors. If you have problems or questions, do not hesitate to ask me directly or the community at <https://github.com/borisveytsman/acmart>, <https://tex.stackexchange.com> or the closest  $\TeX$  Users Group. The world-wide  $\TeX$  Users Group is at <https://tug.org/>; please consider joining us if you use  $\TeX$  regularly.

### 2.1 Installation

Most probably, you already have this package installed in your favorite  $\TeX$  distribution; if not, you may want to upgrade. You may need to upgrade it anyway since this package uses a number of relatively recent packages, especially the ones related to fonts.

The latest released version of this package can be found on CTAN: <https://www.ctan.org/pkg/acmart>. The development version can be found on GitHub: <https://>

---

<sup>1</sup><http://www.acm.org/>

[github.com/borisveytsman/acmart](https://github.com/borisveytsman/acmart). At this address you can file a bug report—or even contribute your own enhancement by making a pull request.

Please note that the version on Github is a development (or experimental) version: please download it for testing new features. The production version is the one on CTAN and ACM sites.

Most users should not attempt to install this package themselves but should rather rely on their  $\TeX$  distributions to provide it. If you decide to install the package yourself, follow the standard rules:

1. Run `latex acmart.ins`. This will produce the file `acmart.cls`
2. Put the files `acmart.cls` and `ACM-Reference-Format.bst` in places where  $\LaTeX$  can find them (see [1] or the documentation for your  $\TeX$  system).
3. Update the database of file names. Again, see [1] or the documentation for your  $\TeX$  system for the system-specific details.
4. The file `acmart.pdf` provides the documentation for the package. (This is probably the file you are reading now.)

As an alternative to items 2 and 3 you can just put the files in the working directory where your `.tex` file is.

This class uses a number of other packages. They are included in all major  $\TeX$  distributions ( $\TeX$ Live, Mac $\TeX$ , Mik $\TeX$ ) of 2015 and later, so you probably have them installed. Just in case here is the list of these packages:

- *amscs*, <http://www.ctan.org/pkg/amscs>
- *amsfonts*, <http://www.ctan.org/pkg/amsfonts>
- *amsmath*, <http://www.ctan.org/pkg/amsmath>
- *binhex*, <http://www.ctan.org/pkg/binhex>
- *balance*, <http://www.ctan.org/pkg/balance>
- *booktabs*, <http://www.ctan.org/pkg/booktabs>
- *caption*, <http://www.ctan.org/pkg/caption>
- *comment*, <http://www.ctan.org/pkg/comment>
- *cm-super*, <http://www.ctan.org/pkg/cm-super>
- *cmap*, <http://www.ctan.org/pkg/cmap>
- *draftwatermark*, <http://www.ctan.org/pkg/draftwatermark>
- *environ*, <http://www.ctan.org/pkg/environ>
- *etoolbox*, <http://www.ctan.org/pkg/etoolbox>

- *fancyhdr*, <http://www.ctan.org/pkg/fancyhdr>
- *float*, <http://www.ctan.org/pkg/float>
- *fontaxes*, <http://www.ctan.org/pkg/fontaxes>
- *geometry*, <http://www.ctan.org/pkg/geometry>
- *graphics*, <http://www.ctan.org/pkg/graphics>
- *hyperref*, <http://www.ctan.org/pkg/hyperref>
- *hyperxmp*, <http://www.ctan.org/pkg/hyperxmp>
- *iftex*, <http://www.ctan.org/pkg/iftex>
- *inconsolata*, <http://www.ctan.org/pkg/inconsolata>
- *libertine*, <http://www.ctan.org/pkg/libertine>
- *manyfoot*, <http://www.ctan.org/pkg/manyfoot>
- *microtype*, <http://www.ctan.org/pkg/microtype>
- *mmap*, <http://www.ctan.org/pkg/mmap>
- *ms*, <http://www.ctan.org/pkg/ms>
- *mweights*, <http://www.ctan.org/pkg/mweights>
- *natbib*, <http://www.ctan.org/pkg/natbib>
- *nccfoots*, <http://www.ctan.org/pkg/nccfoots>
- *newtx*, <http://www.ctan.org/pkg/newtx>
- *oberdiek*, <http://www.ctan.org/pkg/oberdiek>
- *pdftex-def*, <http://www.ctan.org/pkg/pdftex-def>
- *refcount*, <http://www.ctan.org/pkg/refcount>
- *setspace*, <http://www.ctan.org/pkg/setspace>
- *textcase*, <http://www.ctan.org/pkg/textcase>
- *totpages*, <http://www.ctan.org/pkg/totpages>
- *trimspaces*, <http://www.ctan.org/pkg/trimspaces>
- *upquote*, <http://www.ctan.org/pkg/upquote>
- *url*, <http://www.ctan.org/pkg/url>
- *xcolor*, <http://www.ctan.org/pkg/xcolor>
- *xkeyval*, <http://www.ctan.org/pkg/xkeyval>
- *xstring*, <http://www.ctan.org/pkg/xstring>

## 2.2 Invocation and options

To use this class, put in the preamble of your document

```
\documentclass[options]{acmart}
```

There are several options corresponding to the type of the document and its general appearance. They are described below. Generally speaking, the options have key=value forms, for example,

```
\documentclass[format=acmsmall, screen=true, review=false]{acmart}
```

The option `format` describes the format of the output. There are several possible values for this option, for example,

```
\documentclass[format=acmtog]{acmart}
```

Actually the words `format=` can be omitted, e.g.,

```
\documentclass[acmtog, review=false]{acmart}
```

The possible formats are listed in Table 1. Note that formats starting with `acm` are intended for journals and transactions, while formats starting with `sig` are intended for proceedings published as books.

Note that sometimes conference proceedings are published as a special issue (or issues) of an ACM journal. In this case, you should use the journal format for a conference paper. Please contact your conference committee if in doubt.

Starting in 2020, ACM retired formats `sigchi` and `sigchi-a`. SIGCHI conferences now use `sigconf` format for their publications. If a file uses `sigchi` format, a warning is issued, and the format is automatically switched to `sigconf`. Format `sigchi-a` can be used for non-ACM documents only (see Section 2.18).

There are several Boolean options that can take `true` or `false` values. They are listed in Table 2. The words `=true` can be omitted when setting a Boolean option, so instead of `screen=true` one can write just `screen`, for example,

```
\documentclass[acmsmall, screen, review]{acmart}
```

The option `review` is useful when combined with the `manuscript` format option. It provides a version suitable for reviewers and copy editors.

Two samples in the `samples` directory, `manuscript` and `acmsmall-submission`, show manuscripts formatted for submission to ACM.

The default for the option `screen` depends on the publication. At present it is `false` for all publications *but* PACM, since PACM is now electronic-only. Thus PACM titles (see Table 5) set this option to `true`. In the future this option may involve additional features suitable for on-screen versions of articles.

The option `natbib` is used when the corresponding Bib<sub>T</sub><sub>E</sub>X style is based on `natbib`. In most cases you do not need to set it. See Section 2.11.

Table 1: The possible values for the format option

Value	Meaning
<code>manuscript</code>	A manuscript. This is the default.
<code>acmsmall</code>	Small single-column format. Used for CIE, CSUR, JACM, JDIQ, JEA, JERIC, JETC, PACMCGIT, PACMHCI, PACMPL, TAAS, TACCESS, TACO, TALG, TALLIP (formerly TALIP), TCPS, TDS, TEAC, TECS, TELO, THRI, TIIS, TIOT, TISSEC, TIST, TKDD, TMIS, TOCE, TOCHI, TOCL, TOCS, TOCT, TODAES, TODS, TOIS, TOIT, TOMACS, TOMM (formerly TOMCCAP), TOMPECS, TOMS, TOPC, TOPLAS, TOPS, TOS, TOSEM, TOSN, TQC, TRET, TSAS, TSC, TSLP and TWEB, including special issues.
<code>acmlarge</code>	Large single-column format. Used for DTRAP, HEALTH, IMWUT, JOCCH, POMACS and TAP, including special issues.
<code>acmtog</code>	Large double-column format. Used for TOG, including annual conference Technical Papers.
<code>sigconf</code>	Proceedings format for most ACM conferences (with the exceptions listed below) and all ICPS volumes.
<code>sigplan</code>	Proceedings format for SIGPLAN conferences.

The option `anonymous` is used for anonymous review processes and causes all author information to be obscured.

The option `timestamp` is used to include a time stamp in the footer of each page. When preparing a document, this can help avoid confusing different revisions. The footer also includes the page range of the document. This helps detect missing pages in hard copies.

The option `authordraft` is intended for author's drafts that are not intended for distribution. It typesets a copyright block to give the author an idea of its size and the overall size of the paper but overprints it with the phrase "Unpublished working draft. Not for distribution.", which is also used as a watermark. This option sets `timestamp` and `review` to `true`, but these can be overridden by setting these options to `false` *after* setting `authordraft` to `true`.

The option `balance` determines whether the last page in the two column mode has balanced columns. By default it is `true`; however, it may lead to problems for some documents. Set it to `false` if you encounter compilation errors. Note that for one page documents `\balance` command might cause problems. An alternative is the (experimental) option `pbalance`, which uses the new package `pbalance` for this end.

The option `urlbreakonhyphens` determines whether URLs can be split between lines after hyphens. By default it is `true`. Set it to `false` to disallow these breaks.

## 2.3 Top matter

A number of commands set up *top matter* or (in computer science jargon) *metadata* for an article. They establish the publication name, article title, authors, DOI and other

Table 2: Boolean options

Option	Default	Meaning
review	false	A review version: lines are numbered and hyperlinks are colored
screen	see text	A screen version: hyperlinks are colored
natbib	true	Whether to use the natbib package (see Section 2.11)
anonymous	false	Whether to make author(s) anonymous
authorversion	false	Whether to generate a special version for the authors' personal use or posting (see Section 2.3)
nonacm	false	Use the class typesetting options for a non-ACM document, which will not include the conference/journal header and footers or permission statements
timestamp	false	Whether to put a time stamp in the footer of each page
authordraft	false	Whether author's-draft mode is enabled
acmthm	true	Whether to define theorem-like environments, see Section 2.7
balance	true	Whether to balance the last page in two column mode
pbalance	false	Whether to balance the last page in two column mode using pbalance package
urlbreakonhyphens	true	Whether to break urls on hyphens

data. Some of these commands, like `\title` and `\author`, should be put by the authors. Others, like `\acmVolume` and `\acmDOI`—by the editors. Below we describe these commands and mention who should issue them. These macros should be used *before* the `\maketitle` command. Note that in previous versions of ACM classes some of these commands should be used before `\maketitle`, and some after it. Now they all must be used before `\maketitle`.

This class internally loads the `amsart` class, so many top-matter commands are inherited from `amsart` [2].

`\acmJournal` The macro `\acmJournal{<shortName>}` sets the name of the journal or transaction for journals and transactions. The argument is the short name of the publication *in uppercase*, for example,

```
\acmJournal{TOMS}
```

The currently recognized journals are listed in Table 5. Note that conference proceedings published in *book* form do not set this macro.

`\acmConference` The macro `\acmConference[<short name>]{<name>}{<date>}{<venue>}` is used for conference proceedings published in the book form. The arguments are the following:

**short name:** the abbreviated name of the conference (optional).

**name:** the name of the conference.

**date:** the date(s) of the conference.

**venue:** the place of the conference.

Examples:

```
\acmConference[TD'15]{Technical Data Conference}{November
12--16}{Dallas, TX, USA}
\acmConference{SA'15 Art Papers}{November 02--06, 2015}{Kobe, Japan}
```

`\acmBooktitle` By default we assume that conference proceedings are published in the book named *Proceedings of CONFERENCE*, where *CONFERENCE* is the name of the conference inferred from the command `\acmConference` above. However, sometimes the book title is different. The command `\acmBooktitle` can be used to set this title, for example,

```
\acmBooktitle{Companion to the first International Conference on the
Art, Science and Engineering of Programming (Programming '17)}
```

An ACM paper should have either `\acmJournal` or `\acmConference` command. If it has both (or more) commands, the last one takes precedence. Note that if you have the command `\acmConference` in a journal format like `acmsmall`, the class will use conference format for bibstrip and reference citation formatting. In the samples directory there is a file `sample-acmsmall-conf.tex` with the example of this usage.

`\editor` In most cases, conference proceedings are edited. You can use the command

`\editor{<editor>}` to set the editor of the volume. This command can be repeated, for example,

```
\editor{Jennifer B. Sartor}
\editor{Theo D'Hondt}
\editor{Wolfgang De Meuter}
```

`\title` The command `\title`, as in the `amsart` class, has two arguments: one optional, and one mandatory:

```
\title[<ShortTitle>]{<FullTitle>}
```

The mandatory argument is the full title of the article. The optional argument, if present, defines the shorter version of the title for running heads. If the optional argument is absent, the full title is used instead.

It is expected that this command is inserted by the author of the manuscript.

`\subtitle` Besides title, ACM classes allow a subtitle, set with the `\subtitle{<subtitle>}` macro.

The commands for specifying authors are highly structured. The reason is they serve double duty: the authors' information is typeset in the manuscript *and* is used by the metadata extraction tools for indexing and cataloguing. Therefore it is very important to follow the guidelines exactly.

`\author` The basic commands are `\author`, `\orcid` (for the researchers registered with OR-

`\orcid` CID, <http://www.orcid.org/>), `\affiliation` and `\email`. In the simplest case, you

`\affiliation` enter them in this order:

```
\email
\author{...}
\orcid{...}
\affiliation{...}
\email{...}
```

Do *not* use the  $\LaTeX$  `\and` macro or commas, or `\\` between the authors! Each author deserves his or her own `\author` command. An attempt to list several authors or their e-mails in one command leads to a warning or an error. This is not a bug, but the expected behavior.

Note that some formats do not typeset e-mails or ORCID identifiers. Do not worry: the metadata tools will get them.

Sometimes an author has several affiliations. In this case, the `\affiliation` command should be repeated:

```
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
```

Similarly you can repeat the `\email` command.

You may have several authors with the same affiliation, different affiliations, or overlapping affiliations (author  $A_1$  is affiliated with institutions  $I_1$  and  $I_2$ , while author  $A_2$  is affiliated with  $I_2$  only, author  $A_3$  is affiliated with  $I_1$  and  $I_3$ , etc.). The recommended solution is to put the `\affiliation` commands after each author, possibly repeating them:

```
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
\author{...}
\orcid{...}
\affiliation{...}
\email{...}
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
```

In some cases, when several authors share the same affiliation, you can try to save space using the format

```
\author{...}
\email{...}
\author{...}
\email{...}
\affiliation{...}
```

However, this format is not generally recommended.

`\additionalaffiliation` In some cases, too many affiliations can take too much space. The command `\additionalaffiliation{<affiliation>}` creates a footnote after an author’s name with the words “Also with {<affiliation>}”. You should use this command only as a last resort. An example of usage is:

```
\author{G. Tobin}
\author{Ben Trovato}
\additionalaffiliation{%
  \institution{The Th{\o}rv{"a}ld Group}
  \streetaddress{1 Th{\o}rv{"a}ld Circle}
  \city{Hekla}
  \country{Iceland}}
\affiliation{%
  \institution{Institute for Clarity in Documentation}
  \streetaddress{P.O. Box 1212}
  \city{Dublin}
  \state{Ohio}}
```

```
\postcode{43017-6221}}
```

Here Trovato and Tobin share their affiliation with the Institute for Clarity in Documentation, but only Ben Trovato is affiliated with The Thørväld Group.

<pre>\position \institution \department \streetaddress \city \state \postcode \country</pre>	<p>The <code>\affiliation</code> and <code>\additionalaffiliation</code> commands are further structured to interact with the metadata extraction tools. Inside these commands you should use the <code>\position</code>, <code>\institution</code>, <code>\department</code>, <code>\city</code>, <code>\streetaddress</code>, <code>\state</code>, <code>\postcode</code> and <code>\country</code> macros to indicate the corresponding parts of the affiliation. Note that in some cases (for example, journals) these parts are not printed in the resulting copy, but they <i>are</i> necessary since they are used by the XML metadata extraction programs. Do <i>not</i> put commas or <code>\\</code> between the elements of <code>\affiliation</code>. They will be provided automatically.</p>
--------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

The fields `\institution`, `\city` and `\country` are mandatory. If they are not provided, an error or a warning is issued. Currently the absence of `\country` produces an error; ACM may change this in the future.

An example of the author block:

```
\author{A. U. Thor}  
\orcid{1234-4564-1234-4565}  
\affiliation{%  
  \institution{University of New South Wales}  
  \department{School of Biomedical Engineering}  
  \streetaddress{Samuels Building (F25), Kensington Campus}  
  \city{Sidney}  
  \state{NSW}  
  \postcode{2052}  
  \country{Australia}}  
\email{author@nsw.au.edu}  
\author{A. N. Other}  
\affiliation{%  
  \institution{University of New South Wales}  
  \city{Sidney}  
  \state{NSW}  
  \country{Australia}}  
\author{C. O. Respondent}  
\orcid{1234-4565-4564-1234}  
\affiliation{%  
  \institution{University of Pennsylvania}  
  \city{Philadelphia}  
  \state{PA}  
  \country{USA}}  
\affiliation{%  
  \institution{University of New South Wales}  
  \city{Sidney}  
  \state{NSW}  
  \country{Australia}}
```

Note that the old ACM conference formats did not allow more than six authors and

required some effort from authors to achieve alignment. The new format is much better in this.

Sometimes an author works in several departments within the same institution. There could be two situations: the departments are independent, or one department is within another. In the first case, just repeat the command `\department` several times. To handle the second case the command has an optional numerical parameter. The departments with higher numbers are higher in the organizational chart. Compare

```
\affiliation{%
  \department[0]{Department of Lunar Studies} % 0 is the default
  \department[1]{John Doe Institute} % higher than 0
  \institution{University of San Serriffe}
  \country{San Serriffe}}
```

and

```
\affiliation{%
  \department{Department of Lunar Studies} % Not in the John Doe Institute!
  \department{John Doe Institute}
  \institution{University of San Serriffe}
  \country{San Serriffe}}
```

The command `\affiliation` formats its output according to American conventions. This might be wrong for some cases. Consider, for example, a German address. In Germany, the postcode is put before the city and is not separated by a comma. We can handle this order using

```
\affiliation{%
  \institution{Fluginstitut}
  \streetaddress{Sonnenallee 17}
  \postcode{123456}
  \city{Helm}
  \country{Germany}}
```

However, the comma after the postcode is unfortunate: the address will be typeset (in some formats) as

```
Fluginstitut
Sonnenallee 17
123456, Helm, Germany
```

To overcome this problem, the command `\affiliation` has an optional parameter `obeypunctuation`, which can be `false` (the default) or `true`. If this parameter is `true`, `\affiliation` obeys the author's command. Thus

```
\affiliation[obeypunctuation=true]{%
  \institution{Fluginstitut}\}
```

```

\streetaddress{Sonnenallee 17}\
\postcode{123456}
\city{Helm},
\country{Germany}}

```

will be typeset as

```

Fluginstitut
Sonnenallee 17
123456 Helm, Germany

```

Note that you should *not* use this option for journals.

It is expected that these commands are inserted by the author of the manuscript.

`\thanks` Like `amsart` (and unlike standard  $\LaTeX$ ), we allow `\thanks` only *outside* of the commands `\title` and `\author`. This command is obsolete and should *not* be used in most cases. Do not list your acknowledgments or grant sponsors here. Put this information in the `acks` environment (see Section 2.10).

`\authorsaddresses` In some formats, addresses are printed as a footnote on the first page. By default  $\LaTeX$  typesets them itself using the information you give it. However, you can override its choice using the command `\authorsaddresses{<contact addresses>}`, for example,

```

\authorsaddresses{%
  Authors' addresses: G. Zhou, Computer Science Department, College of
  William and Mary, 104 Jameson Rd, Williamsburg, PA 23185, US;
  V. B'eranger, Inria Paris-Rocquencourt, Rocquencourt, France;
  A. Patel, Rajiv Gandhi University, Rono-Hills, Doimukh, Arunachal
  Pradesh, India; H. Chan, Tsinghua University, 30 Shuangqing Rd,
  Haidian Qu, Beijing Shi, China; T. Yan, Eaton Innovation Center,
  Prague, Czech Republic; T. He, C. Huang, J. A. Stankovic University
  of Virginia, School of Engineering Charlottesville, VA 22903, USA;
  T. F. Abdelzaher, (Current address) NASA Ames Research Center,
  Moffett Field, California 94035.}

```

You can *suppress* printing authors' addresses by setting them to an empty string: `\authorsaddresses{}`. Please note that authors' addresses are mandatory for journal articles.

`\titlenote` While the command `\thanks` generates a note without a footnote mark, sometimes  
`\subtitlenote` the authors might need notes more tightly connected to the title, subtitle or author. The  
`\authornote` commands `\titlenote`, `\subtitlenote` and `\authornote` that follow the corresponding  
 commands (`\title`, `\subtitle` and `\author`) generate such notes. For example,

```

\title{This is a title}
\titlenote{This is a titlenote}
\author{A. U. Thor}
\authornote{This is an authornote}

```

Please never use a `\footnote` inside an `\author` or `\title` command since this confuses the metadata extraction software. (Actually these commands now produce errors.)

`\authornotemark` Sometimes one may need to have the same footnote connected to several authors. The command `\authornotemark[number]` adds just the footnote mark, for example,

```
\author{A. U. Thor}
\authornote{Both authors contributed equally to the paper}
...
\author{A. N. Other}
\authornotemark[1]
```

The correct numbering of these marks is the responsibility of the user.

`\acmVolume` The macros `\acmVolume`, `\acmNumber`, `\acmArticle`, `\acmYear` and `\acmMonth` are inserted by the editor and set the journal volume, issue, article number, year and month correspondingly. The arguments of all these commands, including `\acmMonth`, is numerical. For example,

```
\acmVolume
\acmNumber
\acmArticle
\acmYear
\acmMonth
\acmVolume{9}
\acmNumber{4}
\acmArticle{39}
\acmYear{2010}
\acmMonth{3}
```

Note that `\acmArticle` is used not only for journals but also for some conference proceedings.

`\acmArticleSeq` The articles in the same issue of a journal have a *sequence number*. It is used to vertically position the black blob on the first page of some formats. By default it is the same as the article number, but the command `\acmArticleSeq{n}` can be used to change it:

```
\acmArticle{39} % The sequence number will be 39 by default
\acmArticleSeq{5} % We redefine it to 5
```

Setting this number to zero suppresses the blob.

`\acmSubmissionID` If your paper got a Submission ID from the Conference Management System, put it here:

```
\acmSubmissionID{123-A56-BU3}
```

`\acmPrice` The macro `\acmPrice{price}` sets the price for the article, for example,

```
\acmPrice{25.00}
```

Note that you do not need to put the dollar sign here, just the amount. By default the price is \$15.00, unless the copyright is set to `usgov`, `rightsretained`, `iw3c2w3`, or `iw3c2w3g`, when it is suppressed. Note that to override the defaults you need to set the

	price <i>after</i> the <code>\setcopyright</code> command. Also, the command <code>\acmPrice{}</code> suppresses the printing of the price.
<code>\acmISBN</code>	<p>Book-like volumes have ISBN numbers attached to them. The macro <code>\acmISBN{&lt;ISBN&gt;}</code> sets it. Normally it is set by the typesetter, for example,</p> <pre>\acmISBN{978-1-4503-3916-2}</pre> <p>Setting it to the empty string, as <code>\acmISBN{}</code>, suppresses printing the ISBN.</p>
<code>\acmDOI</code>	<p>The macro <code>\acmDOI{&lt;DOI&gt;}</code> sets the DOI of the article, for example,</p> <pre>\acmDOI{10.1145/9999997.9999999}</pre> <p>It is normally set by the typesetter. Setting it to the empty string, as <code>\acmDOI{}</code>, suppresses the DOI.</p>
<code>\acmBadgeR</code> <code>\acmBadgeL</code>	<p>Some conference articles get special distinctions, for example, the artifact evaluation for PPOPP 2016 (see <a href="http://ctuning.org/ae/ppopp2016.html">http://ctuning.org/ae/ppopp2016.html</a>). These articles display special badges supplied by the conference organizers. This class provides commands to add these badges: <code>\acmBadgeR[&lt;url&gt;]{&lt;graphics&gt;}</code> and <code>\acmBadgeL[&lt;url&gt;]{&lt;graphics&gt;}</code>. The first command puts the badge to the right of the title, and the second one—to the left. The arguments have the following meaning: [<i>&lt;url&gt;</i>], if provided, sets the link to the badge authority in the screen version, while <code>{&lt;graphics&gt;}</code> sets the graphics file with the badge image. The file must be a cropped square, which is scaled to a standard size in the output. For example, if the badge image is <code>ae-logo.pdf</code>, the command is</p> <pre>\acmBadgeR[http://ctuning.org/ae/ppopp2016.html]{ae-logo}</pre>
<code>\startPage</code>	<p>The macro <code>\startPage{&lt;page&gt;}</code> sets the first page of the article in a journal or book. It is used by the typesetter.</p>
<code>\terms</code> <code>\keywords</code>	<p>The command <code>\keywords{&lt;keyword, keyword,...&gt;}</code> sets keywords for the article. They must be separated by commas, for example,</p> <pre>\keywords{wireless sensor networks, media access control, multi-channel, radio interference, time synchronization}</pre>
CCSXML <code>\ccsdesc</code>	<p>ACM publications are classified according to the ACM Computing Classification Scheme (CCS). CCS codes are used both in the typeset version of the publications <i>and</i> in the metadata in various databases. Therefore you need to provide both TeX commands and XML metadata with the paper.</p> <p>The tool at <a href="http://dl.acm.org/ccs.cfm">http://dl.acm.org/ccs.cfm</a> can be used to generate CCS codes. After you select the topics, click on “Generate CCS codes” to get results like the following:</p> <pre>\begin{CCSXML} &lt;ccs2012&gt; &lt;concept&gt; &lt;concept_id&gt;10010520.10010553.10010562&lt;/concept_id&gt; &lt;concept_desc&gt;Computer systems organization~Embedded systems&lt;/concept_desc&gt;</pre>

```

    <concept_significance>500</concept_significance>
</concept>
<concept>
  <concept_id>10010520.10010575.10010755</concept_id>
  <concept_desc>Computer systems organization~Redundancy</concept_desc>
  <concept_significance>300</concept_significance>
</concept>
<concept>
  <concept_id>10010520.10010553.10010554</concept_id>
  <concept_desc>Computer systems organization~Robotics</concept_desc>
  <concept_significance>100</concept_significance>
</concept>
<concept>
  <concept_id>10003033.10003083.10003095</concept_id>
  <concept_desc>Networks~Network reliability</concept_desc>
  <concept_significance>100</concept_significance>
</concept>
</ccs2012>
\end{CCSXML}

\ccsdesc[500]{Computer systems organization~Embedded systems}
\ccsdesc[300]{Computer systems organization~Redundancy}
\ccsdesc{Computer systems organization~Robotics}
\ccsdesc[100]{Networks~Network reliability}

```

You just need to copy this code and paste it in your paper anywhere before `\maketitle`.

CCS Concepts and user-defined keywords are required for all articles over two pages in length, and are optional for one- and two-page articles (or abstracts).

`\setcopyright` There are several possibilities for the copyright of the papers published by the ACM: the authors may transfer the rights to the ACM, license them to the ACM, some or all authors might be employees of the US or Canadian governments, etc. Accordingly the command `\setcopyright{...}` is introduced. Its argument is the copyright status of the paper, for example, `\setcopyright{acmcopyright}`. The possible values for this command are listed in Table 3. This command must be placed in the preamble, before `\begin{document}`.

The ACM submission software should generate the right command for you to paste into your file.

`\copyrightyear` Each copyright statement must have the year of copyright. By default it is the same as `\acmYear`, but you can override this using the macro `\copyrightyear`, e.g.,

```

\acmYear{2016}
\copyrightyear{2015}

```

There is a special case for a personal copy that the authors may be allowed to generate for their use or a posting on a personal site (check the instructions for the specific journal or conference for the details). The document option `authorversion=true` produces

Table 3: Parameters for the `\setcopyright` command

Parameter	Meaning
<code>none</code>	The copyright and permission information is not typeset. (This is the option for some ACM conferences.)
<code>acmcopyright</code>	The authors transfer the copyright to the ACM (the “traditional” choice).
<code>acmlicensed</code>	The authors retain the copyright but license the publication rights to ACM.
<code>rightsretained</code>	The authors retain the copyright and publication rights to themselves or somebody else.
<code>usgov</code>	All the authors are employees of the US government.
<code>usgovmixed</code>	Some authors are employees of the US government.
<code>cagov</code>	All the authors are employees of the Canadian government.
<code>cagovmixed</code>	Some authors are employees of the Canadian government.
<code>licensedusgovmixed</code>	Some authors are employees of the US government, and the publication rights are licensed to ACM.
<code>licensedcagov</code>	All the authors are employees of the Canadian government, and the publication rights are licensed to ACM.
<code>licensedcagovmixed</code>	Some authors are employees of the Canadian government, and the publication rights are licensed to ACM.
<code>othergov</code>	Authors are employees of a government other than the US or Canada.
<code>licensedothergov</code>	Authors are employees of a government other than the US or Canada, and the publication rights are licensed to ACM.
<code>iw3c2w3</code>	Special statement for conferences organized by IW3C2.
<code>iw3c2w3g</code>	Special statement for conferences organized by IW3C2, when some authors are approved Google employees.

a special form of the copyright statement for this case. Note that you still need the `\setcopyright` command and (optionally) `\copyrightyear` command to tell TeX about the copyright owner and year. Also, you should be aware that due to the different sizes of the permission blocks for the printed version and authors' version, the page breaks might be different between them.

`abstract` The environment `abstract` must *precede* the `\maketitle` command. Again, this is different from the standard L<sup>A</sup>T<sub>E</sub>X. Putting `abstract` after `\maketitle` will trigger an error.

`teaserfigure` A special kind of figure is used for many two-column conference proceedings. This figure is placed just after the authors but before the main text. The environment `teaserfigure` is used for these figures. This environment must be used *before* `\maketitle`, for example,

```
\begin{teaserfigure}
  \includegraphics[width=\textwidth]{sampleteaser}
  \caption{This is a teaser}
  \label{fig:teaser}
\end{teaserfigure}
```

`\settopmatter` Some information in the top matter is printed for certain journals or proceedings and suppressed for others. You can override these defaults using the command `\settopmatter{<settings>}`. The settings and their meanings are listed in Table 4. For example,

```
\settopmatter{printacmref=false, printccs=true, printfolios=true}
```

The parameter `authorsperrow` requires some explanation. In conference proceedings authors' information is typeset in boxes, several boxes per row (see `sample-sigconf.pdf`, `sample-sigplan.pdf`, etc.). The number of boxes per row is determined automatically. If you want to override this, you can do it using this parameter, for example,

```
\settopmatter{authorsperrow=4}
```

However, in most cases you should *not* do this and should use the default settings. Setting `authorsperrow` to 0 will revert it to the default settings.

The parameter `printacmref` specifies whether to print the ACM bibliographic entry (default), or not. Note that this entry is required for all articles over one page in length, and is optional for one-page articles (abstracts).

`\received` The command `\received[<stage>]{<date>}` sets the history of the publication. The [`<stage>`] argument is optional; the default is Received for the first date and revised for the subsequent ones. For example,

```
\received{February 2007}
\received[revised]{March 2009}
\received[accepted]{June 2009}
```

Table 4: Settings for the `\settopmatter` command

Parameter	Values	Meaning
<code>printccs</code>	true/false	Whether to print CCS categories
<code>printacmref</code>	true/false	Whether to print the ACM bibliographic entry
<code>printfolios</code>	true/false	Whether to print page numbers (folios)
<code>authorsperrow</code>	numeric	Number of authors per row for the title page in conference proceedings formats

`\maketitle`      The macro `\maketitle` must be the last command in the top-matter group. That is it must follow the commands defined in this section.

`\shortauthors`      *After* the command `\maketitle`, the macro `\shortauthors` stores the names of the authors for the running head. You can redefine it if the list of author’s name is too long, e.g.,

```
\maketitle
\renewcommand{\shortauthors}{Zhou et al.}
```

## 2.4 Algorithms

There are now several good packages for typesetting algorithms [3, 4, 5], and the authors are free to choose their favorite one.

## 2.5 Figures and tables

The new ACM styles use the standard L<sup>A</sup>T<sub>E</sub>X interface for figures and tables. There are some important items to be aware of, however.

1. The captions for figures must be entered *after* the figure bodies and for tables *before* the table bodies.
2. The ACM uses the standard types for figures and tables and adds several new ones. In total there are the following types:

**figure, table:** a standard figure or table taking a full text width in one-column formats and one column width in two-column formats.

**figure\*, table\*** in two-column formats, a special figure or table taking a full text width.

**teaserfigure:** a special figure before `\maketitle`.

3. Accordingly, when scaling images, one should use the following sizes:
  - (a) For `teaserfigure`, `figure` in one-column mode or `figure*` in two-column mode, use `\textwidth`. In one-column mode, you can also use `\columnwidth`, which coincides with `\textwidth` in this case.

(b) For figure in two-column mode, use `\columnwidth`.

It is strongly recommended to use the package `booktabs` [6] and follow its main principles of typography with respect to tables:

1. Never, ever use vertical rules.
2. Never use double rules.

It is also a good idea not to overuse horizontal rules.

For table *footnotes* you have several options described in the TeX FAQ [1]. The simplest one is to use a `\minipage` environment:

```
\begin{table}
\caption{Simulation Configuration}
\label{tab:conf}
\begin{minipage}{\columnwidth}
\begin{center}
\begin{tabular}{ll}
\toprule
TERRAIN\footnote{This is a table footnote. This is a
table footnote. This is a table footnote.} &
(200\,m$\times$200\,m) Square\\
Node Number & 289\\
Node Placement & Uniform\\
Application & Many-to-Many/Gossip CBR Streams\\
Payload Size & 32 bytes\\
Routing Layer & GF\\
MAC Layer & CSMA/MMSN\\
Radio Layer & RADIO-ACCNOISE\\
Radio Bandwidth & 250Kbps\\
Radio Range & 20m--45m\\
\bottomrule
\end{tabular}
\end{center}
\bigskip
\footnotesize\emph{Source:} This is a table
sourcenote. This is a table sourcenote. This is a table
sourcenote.

\emph{Note:} This is a table footnote.
\end{minipage}
\end{table}
```

Tables and figures are by default centered. However, in some cases (for example, when you use several subimages per figure) you may need to override this. A good way to do so is to put the contents into a `\minipage` of the width `\columnwidth`.

## 2.6 Descriptions of images

`\Description` Some readers of ACM publications might be visually challenged. These readers might use a voice-over software to read aloud the papers. It is important to provide them a description of each image used in the paper.

The command `\Description[<short description>]{<long description>}` should be placed inside every `figure`, `teaserfigure` or `marginfigure` environment to provide a description of the image(s) used in the figure. Unlike `\caption`, which is used alongside the image, `\Description` is intended to be used instead of the image, for example,

```
\begin{figure}
  \centering
  \includegraphics{voltage}
  \Description{A bell-like histogram centered at  $0.5\text{V}$  with most
  measurements between  $0.2\text{V}$  and  $0.8\text{V}$ }
  \caption{Histogram of the measurements of voltage}
  \label{fig:voltage}
\end{figure}
```

At present the lack of descriptions generates a warning at compilation.

## 2.7 Theorems

The ACM classes define two theorem styles and several pre-defined theorem environments:

**acmplain:** this is the style used for theorem, conjecture, proposition, lemma and corollary, and

**acmdefinition:** this is the style used for example and definition.

These environments are defined by default. In the unusual circumstance that a user does not wish to have these environments defined, the option `acmthm=false` in the preamble will suppress them.

## 2.8 Online-only and offline-only material

`printonly` Some supplementary material in ACM publications is put online but not in the printed  
`screenonly` version. The text inside the environment `screenonly` will be typeset only when the option `screen` (see Section 2.2) is set to true. Conversely, the text inside the environment `printonly` is typeset only when this option is set to false. For example,

```
\section{Supplementary materials}

\begin{printonly}
  Supplementary materials are available in the online version of this paper.
\end{printonly}

\begin{screenonly}
```

```
(The actual supplementary materials.)
\end{screenonly}
```

We use the `comment` package for typesetting this code, so `\begin` and `\end` should start on a line of their own with no leading or trailing spaces.

## 2.9 Note about anonymous mode

`anonsuppress` When the option `anonymous` is selected,  $\TeX$  suppresses author information (including the number of authors) for a blind review. However, sometimes the information identifying the authors may be present in the body of the paper. For example,

```
\begin{anonsuppress}
  This is the continuation of the previous work by the author
  \cite{prev1, prev2}.
\end{anonsuppress}
```

As for the `printonly` and `screenonly` environments, `\begin{anonsuppress}` and `\end{anonsuppress}` should start on a line of their own with no leading or trailing spaces.

## 2.10 Acknowledgments

The traditional “Acknowledgments” section is conventionally used to thank persons and granting agencies for their help and support. However, there are several important considerations about this section.

First, in anonymous mode this section must be omitted: it gives too much information to reviewers. Second, data about grants is extracted and stored separately by the postprocessing software. ACM classes provide facilities for both these tasks.

`acks` The environment `acks` starts an unnumbered section “Acknowledgments” unless the anonymous mode is chosen. Put all thanks inside this environment.

As for the `printonly` and `screenonly` environments, `\begin{acks}` and `\end{acks}` should start on a line of their own with no leading or trailing spaces.

`\grantsponsor`  
`\grantnum` All financial support *must* be listed using the commands `\grantsponsor` and `\grantnum`. These commands tell the postprocessing software about the granting organization and grant. The format of these commands is the following:

```
\grantsponsor{\sponsorID}{\name}{\url}
\grantnum[\url]{\sponsorID}{\number}.
```

Here `{\sponsorID}` is the unique ID used to match grants to sponsors, `{\name}` is the name of the sponsor, `{\url}` is its URL, and `{\number}` is the grant number. The `{\sponsorID}` of the `\grantnum` command must correspond to the `{\sponsorID}` of a `\grantsponsor` command. Some awards have their own web pages, which you can include using the optional argument of the `\grantnum` command.

At present  $\langle sponsorID \rangle$  is chosen by the authors and can be an arbitrary key in the same way the label of a `\cite` is arbitrarily chosen. There might be a change to this policy if the ACM decides to create a global database of sponsoring organizations.

Example:

```
\begin{acks}
  The authors would like to thank Dr. Yuhua Li for providing the
  matlab code of the \textit{BEPS} method.

  The authors would also like to thank the anonymous referees for
  their valuable comments and helpful suggestions. This work is
  supported by the \grantsponsor{GS501100001809}{National Natural
  Science Foundation of
  China}{https://doi.org/10.13039/501100001809} under Grant
  No.: \grantnum{GS501100001809}{61273304}
  and \grantnum[http://www.nnsf.cn/youngscientists]{GS501100001809}{Young
  Scientists' Support Program}.
\end{acks}
```

## 2.11 Bibliography

The ACM uses the `natbib` package for formatting references and the Bib $\TeX$  style file `ACM-Reference-Format.bst` for Bib $\TeX$  processing. You can disable loading of `natbib` using the option `natbib=false` in `\documentclass`. However, it is not recommended, as well as the use of Bib $\TeX$  styles other than `ACM-Reference-Format.bst`, and may delay the processing of the manuscript.

`\citestyle` If you use `natbib`, you can select one of two predefined citation styles using the command `\citestyle`: the author-year format `acmauthoryear` or the numeric format `acmnumeric`. For example,

```
\citestyle{acmauthoryear}
```

Note that numeric citations are the default mode for most formats.

`\setcitestyle` You can further customize `natbib` using the `\setcitestyle` command, for example,

```
\setcitestyle{numbers,sort&compress}
```

One of the more common versions is

```
\setcitestyle{nosort}
```

It is useful if you do not like the way `natbib` sorts citation lists.

If you use `natbib`, then commands like `\citep` and `\citeauthor` are automatically supported. The command `\shortcite` is the same as `\cite` in numerical mode and cites the year in author-date mode.

Note that before version 1.48 the command `\citeyear` put the year in parentheses. In version 1.48 and later it produces just the year; the command `\citeyearpar` can be used to emulate its old behavior.

There are several customized BibTeX entry types and fields in the ACM style file `ACM-Reference-Format.bst` that you may want to be aware of.

The style supports the fields `doi` and `url`, for example,

```
doi = "10.1145/1188913.1188915",
url = "http://ccrma.stanford.edu/~jos/bayes/bayes.pdf",
```

The style supports the arXiv-recommended fields `eprint` and (optionally) `primaryclass`, for example,

```
eprint = "960935712",
primaryclass = "cs",
```

See the examples at <https://arxiv.org/help/hypertex/bibstyles>.

There are several special entry types. Types `online` and `game` are used for Web pages and games, for example,

```
@online{Thornburg01,
  author = "Harry Thornburg",
  year = "2001",
  title = "Introduction to Bayesian Statistics",
  url = "http://ccrma.stanford.edu/~jos/bayes/bayes.html",
  month = mar,
  lastaccessed = "March 2, 2005",
}
```

Entry types `artifactsoftware`, `artifactdataset` (with synonyms `software` and `dataset`) can be used to cite software artifacts and datasets, for example,

```
@ArtifactSoftware{R,
  title = {R: A Language and Environment for Statistical Computing},
  author = {{R Core Team}},
  organization = {R Foundation for Statistical Computing},
  address = {Vienna, Austria},
  year = {2019},
  url = {https://www.R-project.org/},
}
@ArtifactDataset{UMassCitations,
  author = {Sam Anzaroot and Andrew McCallum},
  title = {{UMass} Citation Field Extraction Dataset},
  year = 2013,
  url =
    {http://www.iesl.cs.umass.edu/data/data-umasscitationfield},
  lastaccessed = {May 27, 2019}
}
```

For these entry types you can use the `lastaccessed` field to add the access date for the URL.

There are two ways to enter video or audio sources in the bibliography corresponding to two different possibilities. For standalone sources available online, you can use an online entry and set its `howpublished` field. For example,

```
@online{Obama08,
  author =      "Barack Obama",
  year   =      "2008",
  title  =      "A more perfect union",
  howpublished = "Video",
  day    =      "5",
  url    =      "http://video.google.com/videoplay?docid=6528042696351994555",
  month  =      mar,
  lastaccessed = "March 21, 2008",
}
```

For sources available as attachments to conference proceedings and similar documents, you can use the usual `inproceedings` entry type and set its `howpublished` field:

```
@inproceedings{Novak03,
  author =      "Dave Novak",
  title  =      "Solder man",
  booktitle =   "ACM SIGGRAPH 2003 Video Review on Animation theater Program",
  year   =      "2003",
  publisher =   "ACM Press",
  address =     "New York, NY",
  pages  =      "4",
  month  =      "March 21, 2008",
  doi    =      "10.9999/woot07-S422",
  howpublished = "Video",
}
```

Sometimes you need to cite a complete issue of a journal. The periodical entry type is intended for this:

```
@periodical{JCohen96,
  key =      "Cohen",
  editor =   "Jacques Cohen",
  title  =   "Special issue: Digital Libraries",
  journal =  "Communications of the {ACM}",
  volume =  "39",
  number  =  "11",
  month   =  nov,
  year    =  "1996",
}
```

If you do not know the year of publication, the style will add “[n. d.]” (for “no date”) to the entry.

If you do not know the author (this is often the case for online entries), use the key field to add a key for sorting and citations, for example,

```
@online{TUGInstmem,
  key =      {TUG},
  year =     2017,
  title =    "Institutional members of the {\TeX} Users Group",
  url =      "http://wwtug.org/instmem.html",
  lastaccessed = "May 27, 2017",
}
```

A note about sorting. The current ACM bibliography styles always sort the entries according to authors names and publication year. There is a controversy about sorting names with “von” or “van” part: should Ludwig van Beethoven be sorted under “V” or under “B”? The American practice is to use “van” in sorting, i.e. to file van Beethoven under “V”. However, some authorities recommend to sort Dutch persons according to their last names (see e.g. [https://www.ifla.org/files/assets/cataloguing/pubs/names-of-persons\\_1996.pdf](https://www.ifla.org/files/assets/cataloguing/pubs/names-of-persons_1996.pdf)). While I do not want to take a part in this dispute, I would like to point to the old “noopsort” trick by Oren Patashnik. Add to the .bib file the line

```
@PREAMBLE{"\providecommand{\noopsort}[1]{}"}
```

and then encode the author as

```
author = {Ludwig {\noopsort{Beethoven}}van Beethoven},
```

This will make the author to be sorted as “Beethoven” rather than “van Beethoven”.

The current bst style defines a number of macros for common journal names. In particular, all journals listed in Table 5 are includes, so you can use strings like `journal = taccess` for *ACM Transactions on Accessible Computing*.

## 2.12 Colors

While printed ACM publications are usually black and white, screen mode allows the use of colors. The ACM classes pre-define several colors according to [7]: `ACMBlue`, `ACMYellow`, `ACMOrange`, `ACMRed`, `ACMLightBlue`, `ACMGreen`, `ACMPurple` and `ACMDarkBlue`. You can use them in color assignments.

The ACM provides the following recommendation on color use.

The most accessible approach would be to ensure that your article is still readable when printed in greyscale. The most notable reasons for this are:

1. The most common type of inherited Color Vision Deficiency (CVD) is red-green (in which similar-brightness colors that differ only in their amounts of red or green are often confused), and it affects up to 8% of males and 0.5% of females of Northern European descent.

2. The most common type of acquired Color Vision Deficiency (CVD) is blue-yellow (including mild cases for many older adults).
3. Most printing is in black and white.
4. Situational impairments (e.g., bright sunlight shining on a mobile screen) tend to reduce the entire color gamut, reducing color discriminability.

**Note:** It is *not* safe to encode information using only variations in color (i.e., only differences in hue and/or saturation) as there is bound to be someone affected!

To ensure that you are using the most accessible colors, the ACM recommends that you choose sets of colors to help ensure suitable variations in when printed in greyscale by using either of the following tools:

1. ColourBrewer: <http://colorbrewer2.org/>
2. ACE: The Accessible Colour Evaluator: <http://daprlab.com/ace/> for designing WCAG 2.0 compliant palettes.

### 2.13 Other notable packages and typographic remarks

Several other packages are recommended for specialized tasks.

The package `subcaption` [8] is recommended for complex figures with several subplots or subfigures that require separate subcaptioning. The packages `nomencl` [9] and `glossaries` [10] can be used for the automatic creation of the lists of symbols and concepts used.

By default `acmart` prevents all widows and orphans (i.e., lonely lines at the beginning or end of the page) and hyphenation at the end of the page. This is done by the rather strict settings

```
\widowpenalty=10000
\clubpenalty=10000
\brokenpenalty=10000
```

However, this may lead to frustrating results when the authors must obey a page limit. Setting these penalties to smaller values may help if you absolutely need to.

Another problem might be the too strict line breaking rules. Again, a strategically placed `\sloppy` command or putting the problematic paragraph inside `sloppypar` environment might help—but beware, the results might be, well, sloppy.

Note that the uppercasing in section titles is done using the `textcase` package [11], so the command `\NoCaseChange` inside the title may help to prevent extraneous uppercasing.

### 2.14 Counting words

Some ACM conferences use word count limits for papers. The calculation of word number for a paper with math, tables and figures is not a trivial task. Currently the authoritative word count is done by translating the PDF to text and using `wc -w` on the output.

Authors can use the package `texcount` (used by Overleaf) to get an estimate of the word count. To facilitate this one adds to the beginning of the package metacomments

```
%TC:macro \cite [option:text,text]
%TC:macro \citep [option:text,text]
%TC:macro \citet [option:text,text]
%TC:envir table 0 1
%TC:envir table* 0 1
%TC:envir tabular [ignore] word
%TC:envir displaymath 0 word
%TC:envir math 0 word
%TC:envir comment 0 0
```

and uses `\begin{math}... \end{math}` instead of dollar signs for math. Note that the count is in any case approximate, and the final decision of editors is based on PDF count.

The script `texcount` provides a report of word count in the document.

## 2.15 Disabled or forbidden commands

The goal of `acmart` package is to provide a uniform look and feel for ACM publications. Accordingly, a number of commands is forbidden or disabled in `acmart`.

You may *not* put several authors or several e-mails into a `\author` or `\email` command. This may lead to errors or warning.

You cannot change `\baselinestretch` in your document: this produces an error.

You should not abuse the command `\vspace`: this command may disturb the typesetting of ACM papers.

You should not load `amssymb` package since the package `acmart` defines the corresponding symbols itself.

## 2.16 Notes for wizards

Sometimes you need to change the behavior of `acmart`. The usual way to do this is to redefine commands in the preamble. However, these definitions are executed *after* `acmart` is loaded and certain decisions are made. This presents a number of problems.

For example, one may want to use the `titletoc` package with `acmart`. This package should be loaded before `hyperref`. However, since `acmart` loads `hyperref` itself, the line `\usepackage{titletoc}` in the preamble will lead to grief (see <http://tex.stackexchange.com/questions/357265/using-titletoc-with-acm-acmart-style>).

Another example is passing options to a package. Suppose you want to use the `dvipsnames` option of the `xcolor` package. Normally you cannot do this because `acmart` loads this package itself without options.

The file `acmart-preload-hook.tex` can be used to solve these problems. If this file exists, it will be processed before any other package. You can use this file to load packages or pass options to them. For example, if you put in this file

```
\let\LoadClassOrig\LoadClass
\renewcommand\LoadClass[2][\LoadClassOrig[#1]{#2}%
```

```
\usepackage{titletoc}
```

then `titletoc` will be loaded before `hyperref`. If you put in this file

```
\PassOptionsToPackage{dvipsnames}{xcolor}
```

you will pass `dvipsnames` to `xcolor`.

**Important note.** This hook makes it too easy to create a manuscript that is not acceptable by the ACM. It is even easier to create a file that cannot be compiled. So please do not use it *unless you know what you are doing*. And if you use it, *do not ask for support*. If you decide to use this hook, you are on your own.

`\AtBeginMaketitle` Another hook is `\AtBeginMaketitle`. The commands in this hook are executed before `\maketitle`, for example,

```
\AtBeginMaketitle{\acmPrice{125.00}}
```

## 2.17 Currently supported publications

Table 5: ACM publications and arguments of the `\acmJournal` command

Abbreviation	Publication
CIE	ACM Computers in Entertainment
CSUR	ACM Computing Surveys
DGOV	Digital Government: Research and Practice

Abbreviation	Publication
TWEB	ACM Transactions on the Web

Besides the publications listed in Table 5, there is a special “publication” type FACMP, a forthcoming ACM publication, reserved for new journals which are not assigned an ISSN yet.

## 2.18 A note about `sigchi-a` format

Starting in Spring 2020 ACM retired SIGCHI Extended Abstract format (`sigchi-a`). ACM will not, under any circumstances, accept documents in this format for publication and will not offer technical support to the authors who use this template.

You may use this format in the `nonacm` mode only, as in

```
\documentclass[sigchi-a, nonacm]{acmart}
```

`sidebar`  
`marginfigure`  
`marginfigure`

This format has large margin uses for special figures and tables. This package provides three environments for this with optional captions:

**sidebar:** textual information in the margin,

**marginfigure:** a figure in the margin,

**marginfigure:** a table in the margin.

The environments `figure` and `table` produce figures and tables with the width of the text column. The environments `figure*` and `table*` produce “wide” figures and tables, which take a large part of the margin.

The horizontal sizes of figures are:

1. `figure`: `\columnwidth`,
2. `marginfigure`: `\marginparwidth`,
3. `figure*`: `\fulltextwidth`.

## 3 Implementation

### 3.1 Identification

We start with a declaration of who we are. Most .dtx files put driver code in a separate .drv driver file. We roll this code into the main file and use the pseudo-guard <gobble> for it.

```
1 <class>\NeedsTeXFormat{LaTeX2e}
2 <*gobble>
3 \ProvidesFile{acmart.dtx}
4 </gobble>
5 <class>\ProvidesClass{acmart}
6 [2021/08/29 v1.79 Typesetting articles for the Association for Computing Machinery]
```

And the driver code:

```
7 <*gobble>
8 \documentclass{ltxdoc}
9 \usepackage{array,booktabs,amsmath,graphicx,fancyvrb,tabularx, longtable}
10 \usepackage[tt=false, type1=true]{libertine}
11 \usepackage[varqu]{zi4}
12 \usepackage[libertine]{newtxmath}
13 \usepackage[tableposition=top]{caption}
14 \usepackage{hypdoc}
15 \PageIndex
16 \CodelineIndex
17 \RecordChanges
18 \EnableCrossrefs
19 \begin{document}
20   \DocInput{acmart.dtx}
21 \end{document}
22 </gobble>
23 <*class>
24 \def\@classname{acmart}
```

### 3.2 Preload hook

We preload acmart-preload-hook:

```
25 \InputIfFileExists{acmart-preload-hook.tex}{%
26   \ClassWarning{\@classname}{%
27     I am loading acmart-preload-hook.tex. You are fully responsible
28     for any problems from now on.}}{}
```

### 3.3 Options

We need xkeyval since some of our options may have values:

```
29 \RequirePackage{xkeyval}
```

We use xstring to check whether user input is valid

```
30 \RequirePackage{xstring}
```

We need iftex to check the engine

```
31 \RequirePackage{iftex}
```

format The possible formats

```
32 \define@choicekey*+{acmart.cls}{format}[\ACM@format\ACM@format@nr]{%
33 manuscript, acmsmall, acmlarge, acmtog, sigconf, siggraph,
34 sigplan, sigchi, sigchi-a}[manuscript]{}{%
35 \ClassError{\@classname}{The option format must be manuscript,
36 acmsmall, acmlarge, acmtog, sigconf, siggraph,
37 sigplan, sigchi or sigchi-a}}

```

### 3.4 Setting switches

```

\if@ACM@manuscript Whether we use manuscript mode
153 \newif\if@ACM@manuscript

\if@ACM@journal There are two kinds of publications: journals and books
154 \newif\if@ACM@journal

\if@ACM@journal@bibstrip Sometimes ACM wants a journal-like publication to have conference information in the
bibstrip and vice versa, so we have an additional switch.
155 \newif\if@ACM@journal@bibstrip

\if@ACM@sigchiamode The formatting of SIGCHI extended abstracts is quite unusual. We have a special switch
for them.
156 \newif\if@ACM@sigchiamode

```

#### Setting up switches

```

157 \ifnum\ACM@format@nr=5\relax % siggraph
158 \ClassWarning{\@classname}{%
159 The format siggraph is now obsolete.\MessageBreak
160 I am switching to sigconf.}
161 \setkeys{acmart.cls}{format=sigconf}
162 \fi

163 \ifnum\ACM@format@nr=7\relax % sigchi
164 \ClassWarning{\@classname}{%
165 The format sigchi is now obsolete.\MessageBreak
166 I am switching to sigconf.}
167 \setkeys{acmart.cls}{format=sigconf}
168 \fi

169 \ifnum\ACM@format@nr=8\relax % sigchi
170 \ClassWarning{\@classname}{%
171 ACM SIGCHI has retired the SIGCHI-A template\MessageBreak
172 effective immediately. ACM is keeping this template\MessageBreak
173 option available to authors who are working on legacy\MessageBreak
174 documents only. ACM will not, under any circumstances,\MessageBreak
175 accept documents in this format for publication and\MessageBreak
176 will not offer technical support to the authors who use\MessageBreak
177 this template.\MessageBreak
178 ACM SIGCHI is directing Conference leaders and\MessageBreak
179 authors to publish their articles using the SIGCONF\MessageBreak
180 template call.}
181 \fi

182 \ifnum\ACM@format@nr=0\relax
183 \@ACM@manuscripttrue

```

```

184 \else
185   \@ACM@manuscriptfalse
186 \fi
187 \@ACM@sigchiamodeffalse
188 \ifcase\ACM@format@nr
189 \relax % manuscript
190   \@ACM@journaltrue
191 \or % acsmall
192   \@ACM@journaltrue
193 \or % acmlarge
194   \@ACM@journaltrue
195 \or % acmtog
196   \@ACM@journaltrue
197 \or % sigconf
198   \@ACM@journalfalse
199 \or % siggraph
200   \@ACM@journalfalse
201 \or % sigplan
202   \@ACM@journalfalse
203 \or % sigchi
204   \@ACM@journalfalse
205 \or % sigchi-a
206   \@ACM@journalfalse
207   \@ACM@sigchiamodetrue

209 \if@ACM@journal
210   \@ACM@journal@bibstriptrue
211 \else
212   \@ACM@journal@bibstripfalse
213 \fi

```

### 3.5 Loading the base class and package

At this point we either have `\ACM@fontsize` or use defaults

```

214 \ifx\ACM@fontsize\@empty
215   \ifcase\ACM@format@nr
216   \relax % manuscript
217     \def\ACM@fontsize{9pt}%
218   \or % acsmall
219     \def\ACM@fontsize{10pt}%
220   \or % acmlarge
221     \def\ACM@fontsize{10pt}%
222   \or % acmtog
223     \def\ACM@fontsize{9pt}%
224   \or % sigconf
225     \def\ACM@fontsize{9pt}%
226   \or % siggraph
227     \def\ACM@fontsize{9pt}%
228   \or % sigplan

```

```

229 \def\ACM@fontsize{10pt}%
230 \or % sigchi
231 \def\ACM@fontsize{9pt}%
232 \or % sigchi-a
233 \def\ACM@fontsize{10pt}%
234 \fi
235 \fi
236 \ClassInfo{\@classname}{Using fontsize \ACM@fontsize}
237 \LoadClass[\ACM@fontsize, reqno]{amsart}
238 \RequirePackage{microtype}
    We need etoolbox for delayed code
239 \RequirePackage{etoolbox}
    Booktabs is now the default
240 \RequirePackage{booktabs}
    We need totpages to calculate the number of pages and refcount to use that number
241 \RequirePackage{refcount}
242 \RequirePackage{totpages}
    The \collect@body macro in amsmath is defined using \def. We load environ to
    access the \long version of this command
243 \RequirePackage{environ}
    We use setspace for double spacing
244 \if@ACM@manuscript
245 \RequirePackage{setspace}
246 \onehalfspacing
247 \fi
    We need textcase for better upcasing
248 \RequirePackage{textcase}

```

### 3.6 Citations

We patch `\setcitestyle` to allow, for example, `\setcitestyle{sort}` and `\setcitestyle{nosort}`. We patch `\citestyle` to warn about undefined citation styles.

```

249 \if@ACM@natbib
250 \RequirePackage{natbib}
251 \renewcommand{\bibsection}{%
252 \section*{\refname}%
253 \phantomsection\addcontentsline{toc}{section}{\refname}%
254 }

631   }%
632   \@mparswitchfalse
633   \reversemarginpar
634 \fi

```

`\parindent` Paragraphing

```

\parskip 635 \setlength\parindent{10\p@}
636 \setlength\parskip{\z@}
637 \ifcase\ACM@format@nr
638 \relax % manuscript
639 \or % acmsmall
640 \or % acmlarge
641 \or % acmtog
642 \setlength\parindent{9\p@}%
643 \or % sigconf
644 \or % siggraph
645 \or % sigplan
646 \or % sigchi
647 \or % sigchi-a
648 \fi

```

`\normalparindent` The `amsart` package defines the `\normalparindent` length and initializes it to 12pt (the value of `\parindent` in `amsart`). It is later used to set the `\listparindent` length in the quotation environment and the `\parindent` length in the `\@footnotetext` command. We set `\normalparindent` to the value of `\parindent` as selected by `acmart` for consistent paragraph indents.

```

649 \setlength\normalparindent{\parindent}

```

Footnotes require some consideration. We have several layers of footnotes: front-matter footnotes, “regular” footnotes and the special insert for the bibstrip. In the old ACM classes, the bibstrip was a `\@float`. The problem with floats is that they tend to, well, float—and we want the guarantee they stay.

We use `manyfoot` for layered footnotes instead.

`\copyrightpermissionfootnoterule` This is the footnote rule that separates the bibstrip from the rest of the paper. It is a full width rule.

```
650 \def\copyrightpermissionfootnoterule{\kern-3\p@
651   \hrule \@width \columnwidth \kern 2.6\p@}

652 \RequirePackage{manyfoot}
653 \SelectFootnoteRule[2]{copyrightpermission}
654 \DeclareNewFootnote{authorsaddresses}
655 \SelectFootnoteRule[2]{copyrightpermission}
656 \DeclareNewFootnote{copyrightpermission}
```

`\footnoterule` Tschichold’s rules:

```
657 \def\footnoterule{\kern-3\p@
658   \hrule \@width 4pc \kern 2.6\p@}
```

`\endminipage` We do not use footnote rules in minipages

```
659 \def\endminipage{%
660   \par
661   \unskip
662   \ifvoid\@mpfootins\else
663     \vskip\skip\@mpfootins
664     \normalcolor
665     \unvbox\@mpfootins
666   \fi
667   \@minipagefalse
668   \color@endgroup
669   \egroup
670   \expandafter\@iiparbox\@mpargs{\unvbox\@tempboxa}}
```

`\@textbottom` Add some stretch according to David Carlisle’s advice at <http://tex.stackexchange.com/a/62318/5522>

```
671 \def\@textbottom{\vskip \z@ \@plus 1pt}
672 \let\@texttop\relax
```

In two-column layouts, force both columns to be the same height by inserting extra internal vertical space to fill out the page.

```
673 \ifcase\ACM@format@nr
674 \relax % manuscript
675 \or % acmsmall
676 \or % acmlarge
677 \or % acmtog
678 \flushbottom
679 \or % sigconf
```

```

680 \flushbottom
681 \or % siggraph
682 \flushbottom
683 \or % sigplan
684 \flushbottom
685 \or % sigchi
686 \flushbottom
687 \or % sigchi-a
688 \fi

```

### 3.8 Fonts

Somehow PDFTeX and XeTeX require different incantations to make a PDF compliant with the current Acrobat bugs. Xpdf is much better.

The code below is by Ross Moore.

```

689 \ifPDFTeX
690 \input{glyphtounicode}
691 \pdfglyphtounicode{f_f}{FB00}
692 \pdfglyphtounicode{f_f_i}{FB03}
693 \pdfglyphtounicode{f_f_l}{FB04}
694 \pdfglyphtounicode{f_i}{FB01}
695 \pdfglyphtounicode{t_t}{0074 0074}
696 \pdfglyphtounicode{f_t}{0066 0074}
697 \pdfglyphtounicode{T_h}{0054 0068}
698 \pdfgentounicode=1
699 \RequirePackage{cmap}
700 \fi

```

`\if@ACM@newfonts` Whether we load the new fonts

```

701 \newif\if@ACM@newfonts
702 \@ACM@newfontstrue
703 \IfFileExists{libertine.sty}{\ClassWarning{\@classname}{You do not
704   have the libertine package installed. Please upgrade your
705   TeX}\@ACM@newfontsfalse}
706 \IfFileExists{zi4.sty}{\ClassWarning{\@classname}{You do not
707   have the inconsolata (zi4.sty) package installed. Please upgrade your
708   TeX}\@ACM@newfontsfalse}
709 \IfFileExists{newtxmath.sty}{\ClassWarning{\@classname}{You do not
710   have the newtxmath package installed. Please upgrade your
711   TeX}\@ACM@newfontsfalse}

```

We use Libertine throughout.

```

712 \if@ACM@newfonts
713 \RequirePackage[T1]{fontenc}
714 % Note that the order in which packages are loaded matters,
715 % and the correct order depends on the LaTeX engine used.
716 % See https://github.com/borisveytsman/acmart/issues/402
717 % and https://github.com/borisveytsman/acmart/issues/410
718 \ifxetex

```

```

719 \RequirePackage[libertine]{newtxmath}
720 \RequirePackage[tt=false]{libertine}
721 \setmonofont[StylisticSet=3]{inconsolata}
722 \else
723 \ifluatex
724 \RequirePackage[libertine]{newtxmath}
725 \RequirePackage[tt=false]{libertine}
726 \setmonofont[StylisticSet=3]{inconsolata}
727 \else
728 \RequirePackage[tt=false, type1=true]{libertine}
729 \RequirePackage[varqu]{zi4}
730 \RequirePackage[libertine]{newtxmath}
731 \fi
732 \fi
733 \fi

```

`\liningnums` Libertine defines `\liningnums`, which makes `fontspec` unhappy. While we do not use `fontspec`, some users do.

```

734 \let\liningnums\@undefined
735 \AtEndPreamble{%
736 \DeclareTextFontCommand{\liningnums}{\libertineLF}}

```

The SIGCHI extended abstracts are sans serif:

```

737 \if@ACM@sigchiamode
738 \renewcommand{\familydefault}{\sfdefault}
739 \fi

```

### 3.9 Image descriptions

`\if@Description@present` A local switch: whether there is a description in the given figure

```

740 \newif\if@Description@present
741 \@Description@presenttrue

```

`\if@undescribed@images` A global switch whether some images were *not* described

```

742 \newif\if@undescribed@images
743 \@undescribed@imagesfalse

```

`\Description` The `Description` macro right now just sets switches

```

744 \newcommand\Description[2][\global\@Description@presenttrue\ignorespaces}

```

The global warning

```

745 \AtEndDocument{\if@undescribed@images
746 \ClassWarningNoLine{\@classname}{Some images may lack descriptions}\fi}

```

Hooks for figures and tables. We also patch `algorithm` and `algorithm*` in case somebody uses them.

```

747 \AtBeginEnvironment{figure}{\@Description@presentfalse
748 \let\@vspace\@vspace@orig
749 \let\@vspacer\@vspacer@orig}

```

```

750 \AtBeginEnvironment{figure*}{\@Description@presentfalse
751 \let\@vspace\@vspace@orig
752 \let\@vspacer\@vspacer@orig}
753 \AtEndEnvironment{figure}{\if@Description@present\else
754 \global\@undescribed@imagestrue
755 \ClassWarning{\@classname}{A possible image without description}\fi}
756 \AtEndEnvironment{figure*}{\if@Description@present\else
757 \global\@undescribed@imagestrue
758 \ClassWarning{\@classname}{A possible image without description}\fi}
759 \AtBeginEnvironment{table}{\let\@vspace\@vspace@orig

825       \global\@undescrbed@imagestrue
826       \ClassWarning{\@classname}{A possible image without description}
827       \fi}%
828   \egroup}

margintable The margintable environment:
829 \newenvironment{margintable}{\Collect@Body\@margintable}{}

\@margintable The processing of the saved text
830 \long\def\@margintable#1{\bgroup\let\@vspace\@vspace@orig
831   \let\@vspacer\@vspacer@orig\captionsetup{type=table}%
832   \marginpar{\centering\small#1}\egroup}

```

SIGCHI extended abstracts provide an interesting possibility to push into the margin. Here we use `figure*` and `table*` for this.

```

\fulltextwidth We define the width of the boxes as
833 \newdimen\fulltextwidth
834 \fulltextwidth=\dimexpr(\textwidth+\marginparwidth+\marginparsep)

\@dblfloat We redefine the double-float command. First, we make the size bigger. Second, our
default position is going to be tp (to give marginalia a chance)
835 \if@ACM@sigchiamode
836 \def\@dblfloat{\bgroup\let\@vspace\@vspace@orig
837 \let\@vspacer\@vspacer@orig\columnwidth=\fulltextwidth
838 \let\@endfloatbox\@endwidefloatbox
839 \def\@fpsaddefault{\def\@fps{tp}}%
840 \@float}
841 \fi

\enddblfloat And the end. Just adding a \bgroup.
842 \if@ACM@sigchiamode
843 \def\enddblfloat{%
844 \endfloat\egroup}
845 \fi

\@endwidefloatbox This is the end of a wide box—we basically move everything to the left
846 \def\@endwidefloatbox{%
847 \par\vskip\z@skip
848 \@minipagefalse
849 \outer@nobreak
850 \egroup
851 \color@endbox
852 \global\setbox\@currbox=\vbox{\moveleft
853 \dimexpr(\fulltextwidth-\textwidth)\box\@currbox}%
854 \wd\@currbox=\textwidth
855 }

```

### 3.11 Lists

```

856 \ifcase\ACM@format@nr
857 \relax % manuscript
858 \or % acmsmall
859 \or % acmlarge
860 \or % acmtog
861 \or % sigconf
862 \or % siggraph
863 \or % sigplan
864 \def\labelenumi{\theenumi.}
865 \def\labelenumii{\theenumii.}
866 \def\labelenumiii{\theenumiii.}
867 \def\labelenumiv{\theenumiv.}

```

```

868 \or % sigchi
869 \or % sigchi-a
870 \fi

```

The AMS uses generous margins for lists. Note that `amsart` defines `\leftmargin` values for list levels at the beginning of the document, so we must redefine them in the same manner. Also, note that `amsart` redefines the `enumerate` and `itemize` environments with a `\makeLabel` command that uses `\llap`, so the `\labelwidth` value is (effectively) irrelevant; nonetheless, we follow `amsart` and set `\labelwidth` to `\leftmargin` minus `\labelsep`.

```

871 \newdimen\@ACM@labelwidth
872 \AtBeginDocument{%
873   \setlength\labelsep{4pt}
874   \setlength{\@ACM@labelwidth}{6.5pt}
875
876   %% First-level list: when beginning after the first line of an
877   %% indented paragraph or ending before an indented paragraph, labels
878   %% should not hang to the left of the preceding/following text.
879   \setlength\leftmarginii{\z@}
880   \addtolength\leftmarginii{\parindent}
881   \addtolength\leftmarginii{2\labelsep}
882   \addtolength\leftmarginii{\@ACM@labelwidth}
883
884   %% Second-level and higher lists.
885   \setlength\leftmarginiii{\z@}
886   \addtolength\leftmarginiii{0.5\labelsep}
887   \addtolength\leftmarginiii{\@ACM@labelwidth}
888   \setlength\leftmarginiiii{\leftmarginiii}
889   \setlength\leftmarginiv{\leftmarginiii}
890   \setlength\leftmarginv{\leftmarginiv}
891   \setlength\leftmarginvi{\leftmarginiv}
892   \@listi}
893 \newskip\listisep
894 \listisep\smallskipamount
895 \def\@listI{\leftmargin\leftmarginii
896   \labelwidth\leftmarginii \advance\labelwidth-\labelsep
897   \listparindent\z@
898   \topsep\listisep}
899 \let\@listi\@listI
900 \def\@listii{\leftmargin\leftmarginiii
901   \labelwidth\leftmarginiii \advance\labelwidth-\labelsep
902   \topsep\z@skip}
903 \def\@listiii{\leftmargin\leftmarginiiii
904   \labelwidth\leftmarginiiii \advance\labelwidth-\labelsep}
905 \def\@listiv{\leftmargin\leftmarginiv
906   \labelwidth\leftmarginiv \advance\labelwidth-\labelsep}
907 \def\@listv{\leftmargin\leftmarginv
908   \labelwidth\leftmarginv \advance\labelwidth-\labelsep}
909 \def\@listvi{\leftmargin\leftmarginvi
910   \labelwidth\leftmarginvi \advance\labelwidth-\labelsep}

```

`\descriptionlabel` We do not use a colon by default like `amsart` does:  
`911 \renewcommand{\descriptionlabel}[1]{\upshape\bfseries #1}`

`\description` Make the description environment indentation consistent with that of the `itemize` and `enumerate` environments.

```
912 \renewenvironment{description}{\list{}{%
913   \labelwidth\@ACM@labelwidth
914   \let\makelabel\descriptionlabel}%
915 }{
916   \endlist
917 }
918 \let\enddescription=\endlist % for efficiency
```

### 3.12 Top-matter data

`\if@ACM@maketitle@typeset` The switch to check whether `\maketitle` is already typeset. It is initially false, and setting top matter when it is true is wrong.

```
919 \newif\if@ACM@maketitle@typeset
920 \@ACM@maketitle@typesetfalse
```

We use the `xkeyval` interface to define journal titles and the relevant information

\subtitle The subtitle macro
1278 \def\subtitle#1{\def\@subtitle{#1}}
1279 \subtitle{}

```

`\num@authorgroups` The total number of “groups”. Each group is several authors with the same affiliations(s)  
1280 `\newcount\num@authorgroups`  
1281 `\num@authorgroups=0\relax`

`\num@authors` The total number of authors  
1282 `\newcount\num@authors`  
1283 `\num@authors=0\relax`

`\if@insideauthorgroup` Whether we are continuing an author group  
1284 `\newif\if@insideauthorgroup`  
1285 `\@insideauthorgroupfalse`

`\author` Adding an author to the list of authors and addresses.  
Note that we want to typeset the link to the author’s orcid if known. The problem is, we know the orcid only after the author is entered. The trick is based on the idea that `\csname . . . \endcsname` is `\relax` unless defined. Therefore we typeset authors by the special macro `\csname typeset@author\the\num@authors\endcsname`, which is defined by `\orcid` command.

```

### 3.15 Maketitle hook

The current  $\LaTeX$  provides a nice lthooks mechanism. However, since it is relatively new, we will use oldfashioned approach—at least for now.

```

\@beginmaketitlehook The hook
1791 \ifx\@beginmaketitlehook\undefined
1792   \let\@beginmaketitlehook\@empty
1793 \fi

\AtBeginMaketitle Adding to the hook
1794 \def\AtBeginMaketitle{\g@addto@macro\@beginmaketitlehook}

```

### 3.16 Typesetting top matter

```

\mktitle@bx Some of our formats use a two-column design. Some use a one-column design. In all
cases we use a wide title. Thus we typeset the top matter in a special box to be used in
the construction \@twocolumn[box].
1795 \newbox\mktitle@bx

\maketitle The (in)famous \maketitle. Note that in sigchi-a mode, authors are not in the title
box.

```

Another note: there is a subtle difference between author notes, title notes and thanks. The latter two refer to the paper itself and therefore belong to the copyright/permission block. By the way, this was the default behavior of the old ACM classes.

```

```

`\@printtopmatter` The printing of top matter starts a new page and uses the given title box. Note that for `sigchi-a` we print badges here rather than in `\mktitle` since we want them in the margins.

Note that if there are too many authors, `\mktitle@bx` might overflow the page. Therefore we start with checking this and if this happens, we split the box and print it page by page.

```

### 3.18 Sectioning

`\ACM@NRadjust` Ross Moore's macro.

Initially `\ACM@sect@format@` just passes through its #1 argument unchanged. When a sectioning macro such as `\section` occurs, the `\ACM@NRadjust` redefines `\ACM@sect@format@` to expand into the styling commands; e.g., `\@secfont`. Then `\Sectionformat` is temporarily redefined to produce `\realSectionformat{\ACM@sect@format{#1}}{#2}`, which ultimately becomes `\Sectionformat{\@secfont{#1}}{#2}`. This is done to allow `\Sectionformat` to be variable, as may be needed in particular circumstances. Its current expansion is saved as `\realSectionformat` which is used with the modified 1st argument, then `\Sectionformat` is reverted to its former expansion.

To style the section-number, the line `#1{}` is used at the end of `\ACM@NRadjust`. This imposes style-changing commands for fonts and sizes, but any `\MakeUppercase` acts on just the `{}`. It's a bit hacky, by essentially assuming that only numbers occur here, not letters to be case-changed. (This should be acceptable in a class-file, as it ought to be possible to change the case elsewhere, if that was ever desired.) Also, it can result in `\@adddotafter` being called too soon, so a slight adjustment is made, via `\ACM@adddotafter`, which now tests whether its argument is empty. But the coding has to allow for other packages to have also patched `\@adddotafter`.

```

### 3.19 TOC lists

`\@dotsep` Related to the `\tableofcontents` are all the horizontal fillers. Base  $\TeX$  defines `\@dottedtocline`, which we should not disable. Yet, this command expects `\@dotsep` to be defined but leaves this to the class implementation. Since `amsart` does not provide this, we copy the standard variant from `article` here.

```
2855 \providecommand*\@dotsep{4.5}
```

### 3.20 Theorems

`\@acmplainbodyfont` The font to typeset the body of the `acmplain` theorem style.

```
2856 \def\@acmplainbodyfont{\itshape}
```

`\@acmplainindent` The amount to indent the `acmplain` theorem style.

```
2857 \def\@acmplainindent{\parindent}
```

`\@acmplainheadfont` The font to typeset the head of the `acmplain` theorem style.

```
2858 \def\@acmplainheadfont{\scshape}
```

`\@acmplainnotefont` The font to typeset the note of the `acmplain` theorem style.

```
2859 \def\@acmplainnotefont{\@empty}
```

Customization of the `acmplain` theorem style:

```

Make acmplain the default theorem style.

```
2916 \theoremstyle{acmplain}
```

Delay defining the theorem environments until after other packages have been loaded. In particular, the `cleveref` package must be loaded before the theorem environments are defined in order to show the correct environment name (see <https://github.com/borisveytsman/acmart/issues/138>). The `acmthm` option is used to suppress the definition of any theorem environments. Also, to avoid obscure errors arising from these environment definitions conflicting with environments defined by the user or by user-loaded packages, we only define environments that have not yet been defined.

```

2917 \AtEndPreamble{%
2918   \if@ACM@acmthm
2919     \theoremstyle{acmplain}
2920     \@ifundefined{theorem}{%

2965 {\@proofnamefont #1\@addpunct{.}}]\ignorespaces
2966 }{%
2967 \popQED\endtrivlist\@endpefalse
2968 }
```

### 3.21 Balancing columns

We need balancing only if the user did not disable it, and we use a two column format. Note that `pbalance` uses a different mechanism.

```
2969 \AtEndPreamble{%
2970 \if@ACM@pbalance
2971 \global\@ACM@balancefalse
2972 \ifcase\ACM@format@nr
2973 \relax % manuscript
2974 \or % acmsmall
2975 \or % acmlarge
2976 \or % acmtog
2977 \RequirePackage{pbalance}%
2978 \or % sigconf
2979 \RequirePackage{pbalance}%
2980 \or % siggraph
2981 \RequirePackage{pbalance}%
2982 \or % sigplan
2983 \RequirePackage{pbalance}%
2984 \or % sigchi
```

```

2985         \RequirePackage{pbalance}%
2986     \or % sigchi-a
2987 \fi
2988 \fi
2989 \if@ACM@balance
2990     \ifcase\ACM@format@nr
2991     \relax % manuscript
2992     \global\@ACM@balancefalse
2993     \or % acsmall
2994     \global\@ACM@balancefalse
2995     \or % acmlarge
2996     \global\@ACM@balancefalse
2997     \or % acmtog
2998     \RequirePackage{balance}%
2999     \or % sigconf
3000     \RequirePackage{balance}%
3001     \or % siggraph
3002     \RequirePackage{balance}%
3003     \or % sigplan
3004     \RequirePackage{balance}%
3005     \or % sigchi
3006     \RequirePackage{balance}%
3007     \or % sigchi-a
3008     \global\@ACM@balancefalse
3009 \fi
3010 \fi
3011 }
3012 \AtEndDocument{%
3013 \if@ACM@balance
3014 \if@twocolumn
3015 \balance
3016 \fi\fi}

```

### 3.22 Acknowledgments

\acksname

```
3017 \newcommand\acksname{Acknowledgments}
```

\acks This is a comment-like structure

```

3018 \specialcomment{acks}{%
3019 \begingroup
3020 \section*{\acksname}
3021 \phantomsection\addcontentsline{toc}{section}{\acksname}
3022 }{%
3023 \endgroup
3024 }

```

\grantsponsor We just typeset the name of the sponsor

```
3025 \def\grantsponsor#1#2#3{#2}
```

`\grantnum`

```
3026 \newcommand\grantnum[3][\#3%
3027 \def\@tempa{#1}\ifx\@tempa\empty\else\space(\url{#1})\fi}
```

### 3.23 Conditional typesetting

We use the `comment` package for conditional typesetting:

```
3028 \AtEndPreamble{%
3029 \if@ACM@screen
3030 \includecomment{screenonly}
3031 \excludecomment{printonly}
3032 \else
3033 \excludecomment{screenonly}
3034 \includecomment{printonly}
3035 \fi
3036 \if@ACM@anonymous
3037 \excludecomment{anonsuppress}
3038 \excludecomment{acks}
3039 \else
3040 \includecomment{anonsuppress}
3041 \fi}
```

### 3.24 Additional bibliography commands

`\showeprint` The command `\showeprint` has two arguments: the (optional) prefix and the eprint number. Right now the only prefix we understand is the (lowercase) word ‘arxiv’.

```
3042 \newcommand\showeprint[2][arxiv]{%
3043 \def\@tempa{#1}%
3044 \ifx\@tempa\empty\def\@tempa{arxiv}\fi
3045 \def\@tempb{arxiv}%
3046 \ifx\@tempa\@tempb\relax
3047 arXiv:\href{https://arxiv.org/abs/#2}{#2}%
3048 \else
3049 \def\@tempb{arXiv}%
3050 \ifx\@tempa\@tempb\relax
3051 arXiv:\href{https://arxiv.org/abs/#2}{#2}%
3052 \else
3053 arXiv:#2%
3054 \fi
3055 \fi}
```

### 3.25 Index

`\theindex` Standard `amsart` uses plain page style in index pages. This clashes with line numbering for review option, so we redefine it.

```
3056 \def\theindex{\@restonecoltrue\if@twocolumn\@restonecolfalse\fi
3057 \columnseprule\z@ \columnsep 35\p@
3058 \@indextitlestyle
```

```

3059 \let\item\@idxitem
3060 \parindent\z@ \parskip\z@\@plus.3\p@\relax
3061 \raggedright
3062 \hyphenpenalty\@M
3063 \footnotesize}

```

### 3.26 End of Class

`\vspace` We do not disable `\vspace`, but add warning to it

```

3064 \let\@vspace@orig=\@vspace
3065 \let\@vspacer@orig=\@vspacer
3066 \apptocmd{\@vspace}{\ClassWarning{\@classname}{\string\vspace\space should
3067   only be used to provide space above/below surrounding
3068   objects}}{}{}
3069 \apptocmd{\@vspacer}{\ClassWarning{\@classname}{\string\vspace\space should
3070   only be used to provide space above/below surrounding
3071   objects}}{}{}
3072 \let\@vspace@acm=\@vspace
3073 \let\@vspacer@acm=\@vspacer

```

`\ACM@origbaselinestretch` We produce an error if the user tries to change `\baselinestretch`

```

3074 \let\ACM@origbaselinestretch\baselinestretch
3075 \AtEndDocument{\ifx\baselinestretch\ACM@origbaselinestretch\else
3076   \ClassError{\@classname}{An attempt to redefine
3077     \string\baselinestretch\space detected. Please do not do this for
3078     ACM submissions!}\fi}

3079 \normalfont\normalfont\frenchspacing
3080 </class>

```

## Change History

1.48	General: Added prologue option to xcolor . . . . .	46	\if@ACM@printacmref: Added warning for longer papers . . . . .	69
	Bib code cleanup (Zack Weinberg)	33	\keywords: Added warning for missing keywords . . . . .	69
	Documentation update (siggraph)	33	General: ACM reference format is now mandatory for papers over one page; CCS concepts and keywords are now mandatory for papers over two pages . . . . .	33
1.49	General: New journal: DTRAP . . . . .	33	Authors' addresses are mandatory for journal articles . . . . .	33
1.53	General: New journals: PACMCGIT, TIOT, TDSCI . . . . .	33		
	Rearranged docs . . . . .	33		
1.54	General: Moved footnote stuff before hyperref call (Ross Moore) . . . . .	33	1.69	\vspace: Added the changed command to avoid grouping . . . . .
1.56	General: Documented \Description	33	1.70	General: Name change for TDS . . . . .
1.57	General: Booktabs package is now the default . . . . .	33	1.71	General: Bibliography change: volume for @inproceedings is now in brackets together with series . . . . .
1.58	General: Changes in samples (Enrico Gregorio) . . . . .	33		LuaTeX now uses the OTF versions of fonts . . . . .
	New journal: HEALTH. TDS is renamed to TDSCI . . . . .	33		Retired sigchi and sigchi-a . . . . .
1.60	\if@ACM@urlbreakonhyphens: introduced macro . . . . .	34	1.75	General: Documentation update . . . . .
	General: New option: urlbreakonhyphens . . . . .	33	1.78	General: Documentation update: Word count . . . . .
1.62	General: New journal: TELO . . . . .	33	1.79	General: Updated indormation for TAP, TCPS, TEAC . . . . .
1.63	General: New journal: FACMP . . . . .	33	v1.00	General: First released version . . . . .
	New journal: TQUANT . . . . .	33	v1.01	General: Changed hyperref colors in screen mode (closes <a href="https://github.com/borisveytsman/acmart/issues/1">https://github.com/borisveytsman/acmart/issues/1</a> ) . . . . .
1.63a	General: Move: TQUANT to TQC . . . . .	33		Defined ACM colors . . . . .
1.64	General: Putting abstract after \maketitle now causes an error . . . . .	33		Explicitly put draft option (closes <a href="https://github.com/borisveytsman/acmart/issues/4">https://github.com/borisveytsman/acmart/issues/4</a> ) . . . . .
1.65	General: New journal: DGOV . . . . .	33		Set headheight to 1pc for all formats (closes <a href="https://github.com/borisveytsman/acmart/issues/4">https://github.com/borisveytsman/acmart/issues/4</a> ) . . . . .
1.66	\@mkauthorsaddresses: Added warning for missing addresses . . . . .	92		
	\ccsdesc@parse: Added warning for missing concepts . . . . .	72		

	<a href="https://github.com/borisveytsman/acmart/issues/5">https://github.com/borisveytsman/acmart/issues/5</a> ) . . . . .	33		<code>\@mkttitle@iii</code> : Added processing badges . . . . .	84
v1.02	General: Added TOPS and TSC (closes <a href="https://github.com/borisveytsman/acmart/issues/12">https://github.com/borisveytsman/acmart/issues/12</a> ) . . . . .	33		Made more generic . . . . .	84
	Documentation changes (closes <a href="https://github.com/borisveytsman/acmart/issues/13">https://github.com/borisveytsman/acmart/issues/13</a> ) . . . . .	33		<code>\@mkttitle@iv</code> : Made more generic . . . . .	85
				<code>\@printtopmatter</code> : Added processing badges . . . . .	81
v1.03	<code>\@formatdoi</code> : Added macro . . . . .	74		<code>\@subtitlefont</code> : Added macro . . . . .	83
	<code>\if@ACM@authorversion</code> : Added macro . . . . .	35		<code>\@titlefont</code> : Added macro . . . . .	82
	<code>\maketitle</code> : Added special case of authorversion . . . . .	77		<code>\acmBadgeL</code> : Added macro . . . . .	68
	General: Added anonsuppress environment . . . . .	33		<code>\acmBadgeR</code> : Added macro . . . . .	68
	Added authorversion option (closes <a href="https://github.com/borisveytsman/acmart/issues/9">https://github.com/borisveytsman/acmart/issues/9</a> ) . . . . .	33	v1.07	<code>\if@ACM@badge</code> : Added macro . . . . .	68
v1.04				<code>\maketitle</code> : Corrected a bug with abstract footnotes . . . . .	77
	<code>\acmArticleSeq</code> : Name change by Matthew Fluet . . . . .	67		Corrected a bug with permission and footnotes order . . . . .	77
	<code>\acmDOI</code> : Name change by Matthew Fluet . . . . .	68	v1.08	General: SIGPLAN reformatting by Matthew Fluet . . . . .	33
	<code>\acmISBN</code> : Name change by Matthew Fluet . . . . .	68		Typos corrected (Tobias Pape) . . . . .	33
	General: Updated bibliography for siggraph . . . . .	33	v1.09	General: Revert SIGPLAN caption rules . . . . .	33
v1.05			v1.10		
	General: Added processing doi numbers for acmsiggraph and doi numbers for sigproc.bib . . . . .	33		<code>\maketitle</code> : Corrected a bug with doi in manuscript and author version, <a href="https://github.com/borisveytsman/acmart/issues/36">https://github.com/borisveytsman/acmart/issues/36</a> . . . . .	77
	Patched <code>\setcitestyle</code> command; closes <a href="https://github.com/borisveytsman/acmart/issues/19">https://github.com/borisveytsman/acmart/issues/19</a> . . . . .	33		General: Changes of ‘licensedothergov’ wording . . . . .	72
v1.06				<code>standardpagestyle</code> : Reversed folios location . . . . .	96
	<code>\@ACM@badge@skip</code> : Added macro . . . . .	68	v1.11		
	<code>\@ACM@badge@width</code> : Added macro . . . . .	68		General: Customization of ACM theorem styles and proof environment by Matthew Fluet . . . . .	33
	<code>\@ACM@title@width</code> : Added macro . . . . .	68	v1.12		
	<code>\@mkttitle@i</code> : Added processing badges . . . . .	83		<code>\@marginfigure</code> : Now centering by default . . . . .	53
	Made generic . . . . .	83		<code>\@marginable</code> : Now centering by default . . . . .	53
	<code>\@mkttitle@ii</code> : Now this macro is obsolete . . . . .	84		<code>\@parfont</code> : Moved to <code>\section@raggedright</code> . . . . .	102
				<code>\copyrightpermissionfootnoterule</code> : Added macro . . . . .	49
				<code>\descriptionlabel</code> : Redefined . . . . .	56
				<code>\footnoterule</code> : Made shorter . . . . .	49
				<code>\if@ACM@natbib@override</code> : Added macro . . . . .	36

\if@ACM@newfonts: Added macro	50	\department: Added macro	85
\maketitle: Moved thankses to copyrightpermission box	77	\grantnum: Added macro	108
\section@raggedright: Introduced macro	102	\grantsponsor: Added macro	107
General: Added graceful behavior when libertine fonts are absent	50	\if@insideauthorgroup: Introduced macro	64
Documentation updates	33	\institution: Added macro	85
v1.13		\num@authorgroups: Renamed	64
\@mpfootnotetext: Made minipage footnotes centered	44	\orcid: Introduced macro	66
\bibliographystyle: Redefined macro	46	\position: Added macro	85
\bibstyle@acmauthoryear: Added macro	41	\postcode: Added macro	85
\bibstyle@acmnumeric: Added macro	41	\state: Added macro	85
\if@ACM@printfolios: Added macro	70	\streetaddress: Added macro	85
General: Font adjustments for acmsmall	86	standardpagestyle: Better handling of anonymous mode	96
Increased font size for ACM Large	38	v1.16	
Print bibliographic information by default for the proceedings	70	\@headfootfont: Added macro	96
standardpagestyle: Added headers for sigs	96	General: Formatting header/footer (Matthew Fluet)	33
Expanded headers for sigchi-a	96	standardpagestyle: Customize header/footer text font	96
Suppressed folios if sig	96	v1.17	
v1.14		\@makefnmark: Redefined	44
\bibstyle@acmauthoryear: Moved def of \bibstyle@acmauthoryear before use	41	\@mkauthors: TOG now uses the same authors block as other journals	86
\bibstyle@acmnumeric: Moved def of \bibstyle@numeric before use	41	\@mkauthors@ii: Deleted	89
General: \citestyle updates (Matthew Fluet)	33	\@mkbibcitation: Added \nobreak	93
Patched \citestyle	39	Changed format for sigs	93
v1.15		\acmArticle: The default is now numerical	67
\@ACM@addtoaddress: Added macro	85	\acmMonth: The default must be numerical. Closes #50.	67
\@mkauthors@iii: New authors system	89	\acmNumber: The default is now numerical	67
\@shortauthors: Introduced macro	96	\acmVolume: The default is now numerical	67
\@typeset@author@bx: Moved to separate macro	89	\acmYear: The default is now numerical	67
\acks: Added macro	107	\description: Decreased indent	56
\affiliation: Added code for author groups	65	\grantnum: Added url	108
\author: Added code for author groups	64	\grantsponsor: Renamed	107
\city: Added macro	85	\if@ACM@printacmref: Renamed from \if@ACM@printbib	69
\country: Added macro	85	General: Slightly decreased margins for sigs	47
		standardpagestyle: Added paper title to sigs	96
		v1.18	
		\@mkauthors@i: Now we andify affiliations	88

\@typeset@author@line: Added macro . . . . .	87	standardpagestyle: Corrected printfolios (Matthew Fluet) . . . . .	96
General: Natbib is now the default for all formats . . . . .	33	v1.30 \department: Added optional parameter . . . . .	85
v1.19 \@mkabstract: Include 'Abstract' in PDF bookmarks (Matthew Fluet) . . . . .	93	General: Added \frenchspacing . . . . .	109
\acks: Include 'Acknowledgements' in PDF bookmarks (Matthew Fluet) . . . . .	107	Bibtex style now recognizes https:// in doi . . . . .	33
General: Include 'Abstract', 'Acknowledgements', and 'References' in PDF bookmarks (Matthew Fluet) . . . . .	33	Switched to T1: looks like libertine has problems with \l in OT1 . . . . .	50
Include 'References' in PDF bookmarks (Matthew Fluet) . . . . .	39	Updated IMWUT and PACMPL . . . . .	56
v1.20 \@mkabstract: Deleted spurious space . . . . .	93	v1.31 \@additionalaffiliation: Added macro . . . . .	65
General: Bug fixes for bst . . . . .	33	\@mkbibcitation: Disabled linebreak . . . . .	93
v1.21 \showeprint: Added macro . . . . .	108	\@startsection: Added \tochangmeasure . . . . .	41
v1.22 General: More bibliography changes for Aptara . . . . .	33	Redefined macro . . . . .	43
v1.23 General: Add PACMPL journal option . . . . .	33	\@textbottom: Redefined . . . . .	49
v1.24 General: Add IMWUT journal option . . . . .	56	\acmMonth: The default now is the current month (Matteo Riondato) . . . . .	67
v1.25 General: Updated PACMPL . . . . .	56	\acmYear: The default now is the current year (Matteo Riondato) . . . . .	67
v1.26 General: Corrected \shortcite bug . . . . .	33	\additionalaffiliation: Added macro . . . . .	65
Documentation typos fixed (thanks to Stephen Spencer) . . . . .	33	\l@section: Redefined macro . . . . .	44
v1.27 \if@ACM@printccs: Typo corrected . . . . .	69	\l@subsubsection: Redefined macro . . . . .	44
v1.28 \ccsdesc@parse: Change from \ to to \textrightarrow (Matteo Riondato) . . . . .	71	General: Documentation changes . . . . .	33
General: Corrected option natbib behavior . . . . .	41	v1.32 \@formatdoi: New doi format . . . . .	74
Got rid of warnings in pdf keywords . . . . .	45	General: Added POMACS journal option . . . . .	33
v1.29 \@mkabstract: Removed spurious indentation (John Wickerson) . . . . .	93	Format siggraph is now obsolete . . . . .	33
\ccsdesc@parse: Add spacing after bullet and around rightarrow; semicolon separators no longer in bold/italic (John Wickerson) . . . . .	71	v1.33 \@ACM@addtoaddress: Added obeypunctuation code . . . . .	85
General: Increased head to 13pt . . . . .	47	\@mkauthors@i: Added obeypunctuation code . . . . .	88
		\@mkauthors@iii: Added obeypunctuation code . . . . .	89
		\@mkauthors@iv: Added obeypunctuation code . . . . .	90
		\@subtlefont: Added \normalsize . . . . .	83
		\ACM@linecountL: Renamed macro . . . . .	95
		\ACM@linecountR: Added macro . . . . .	95
		\ACM@timestamp: Added current page number . . . . .	95
		Added macro (Michael D. Adams) . . . . .	95
		Added submission id . . . . .	95

<code>\acmSubmissionID</code> : Added macro . . .	68	<code>\ACM@linecount@bx</code> : Rulers now are continuous . . . . .	94
<code>\city</code> : Added obeypunctuation code	85	<code>\ACM@linecountL</code> : Rulers now are continuous . . . . .	95
<code>\country</code> : Added obeypunctuation code . . . . .	85	<code>\ACM@linecountR</code> : Rulers now are continuous . . . . .	95
<code>\department</code> : Added obeypunctuation code . . . . .	85	<code>\maketitle</code> : Added date to the bibstrip in conf proceedings . . . . .	77
<code>\if@ACM@affiliation@obeypunctuation</code> : Added macro . . . . .	65	Deleted 'DOI' from doi numbers . . . . .	77
<code>\if@ACM@authordraft</code> : Added macro	36	Rearranged bibstrip . . . . .	77
<code>\if@ACM@natbib@override</code> : Deleted macro . . . . .	36	The <code>\terms</code> command is now obsolete . . . . .	77
<code>\if@ACM@timestamp</code> : Added macro (Michael D. Adams) . . . . .	36	<code>\terms</code> : The <code>\terms</code> command now just produces a warning . . . . .	69
<code>\institution</code> : Added obeypunctuation code . . . . .	85	v1.35	
<code>\maketitle</code> : Fixed the bug with figures on top and bottom of the title page, thanks to David Epstein	77	<code>\bibstyle@acmauthoryear</code> : Square brackets for author-year style . . . . .	41
<code>\position</code> : Added obeypunctuation code . . . . .	85	General: BibTeX bug fixed: et al. . . . .	33
<code>\postcode</code> : Added obeypunctuation code . . . . .	85	If the copyright is set to usgov or rigtsretained, the price is suppressed . . . . .	72
<code>\state</code> : Added obeypunctuation code	85	v1.36	
<code>\streetaddress</code> : Added obeypunctuation code . . . . .	85	<code>\@ACM@authorsperrow</code> : Added macro	70
General: Added acmart-preload-hook	33	<code>\@mkauthors@iii</code> : Added authorsperrow override . . . . .	89
Added cmap and glyptounicode . . . . .	50	<code>\@mkauthors@iv</code> : Added authorsperrow override . . . . .	90
BibTeX comma before articleno bug corrected . . . . .	33	<code>\if@ACM@authordraft</code> : Corrected typo, thanks to bargteil . . . . .	36
BibTeX crossref bug corrected . . . . .	33	General: Added PACMHCI journal options . . . . .	56
BibTeX numpages bug corrected . . . . .	33	Added the possibility to adjust number of author boxes per row in conference formats . . . . .	33
Documentation updates . . . . .	33	v1.37	
Moved <code>\ci</code> tename definition for non-natbib bibliography, so a package may redefine it . . . . .	45	<code>\description</code> : Reduce list indentation (Matthew Fluet) . . . . .	56
Switched to Type 1 fonts for libertine even if OTF-capable engine is used (Kai Mindermann) . . . . .	50	<code>\descriptionlabel</code> : Reduce list indentation (Matthew Fluet) . . . . .	56
<code>firstpagestyle</code> : Added right linecount for two-column formats	99	<code>\normalparindent</code> : Set <code>\normalparindent</code> (Matthew Fluet) . . . . .	48
Added timestamp (Michael D. Adams) . . . . .	99	General: Reduce list indentation (Matthew Fluet) . . . . .	55
<code>standardpagestyle</code> : Added right linecount for two-column formats	96	Set <code>\normalparindent</code> ; Reduce list indentation (Matthew Fluet) . . . . .	33
Added timestamp (Michael D. Adams) . . . . .	96	v1.38	
v1.34		<code>\@mkbibcitation</code> : Deleted DOI from doi numbers . . . . .	93
		General: Increase default font size for SIGPLAN . . . . .	33, 38

\liningnums: Workaround for compatibility with fontspec . . . . .	51	XeTeX now uses OTF fonts (Joachim Breitner) . . . . .	50
\maketitle: Added authors' addresses Thankses go before authors' addresses . . . . .	77	firstpagestyle: We now use journal abbreviation for footers . . . . .	99
\num@author: Introduced macro . . . . .	64	standardpagestyle: We now use journal abbreviation for footers . . . . .	96
General: Added etoolbox . . . . .	33	v1.52	
Bst file bug fixes: label width is calculated correctly . . . . .	33	\@copyrightowner: Rewording of licenses . . . . .	73
Delayed hypersetup since journal options may change screen mode . . . . .	45	\@copyrightpermission: Another rewording of copyright statements for iw3c2w3[g] . . . . .	74
PACM now set screen to true . . . . .	56	v1.53	
Restore theorem defs to class file . . . . .	33	General: Added PACMCGIT, TIOT, TDSCI . . . . .	56
v1.47		v1.54	
General: New journal: THRI . . . . .	33	\@mkbibcitation: Bug corrected (Ross Moore) . . . . .	93
v1.48		\@shortauthors: Added submission id in anonymous mode . . . . .	96
\@headfont: Deleted unnecessary switch (Michael D. Adams) . . . . .	96	\ACM@NR@adjustedSectionFormat: Added macro . . . . .	101
\@mkabstract: Removed spurious indentation if abstract is followed by an empty line . . . . .	93	\ACM@NRadjust: Added macro . . . . .	100
\ACM@timestamp: Formatting change (Michael D. Adams) . . . . .	95	\ACM@adddotafter: Added macro . . . . .	101
\if@ACM@review: Review mode now switches on folios . . . . .	35	\author: Added submission id in anonymous mode . . . . .	64
\maketitle: Added acmart and version info to pdfcreator tag . . . . .	77	\if@ACM@nonacm: Added macro . . . . .	35
Added language and doctitle attributes to PDF (Andreas Reichinger) . . . . .	77	General: Added Ross's patch for sectioning . . . . .	101
Suppressed empty DOI (Serguei Mokhov) . . . . .	77	Deleted indent for subsection . . . . .	101
General: \citeyear no longer behaves like \citeyearpar . . . . .	45	XeTeX now uses T1 encoding . . . . .	50
Code prettying (Michael D. Adams) . . . . .	33	v1.55	
Initial support for Biblatex (Daniel Thomas) . . . . .	33	\@mkbibcitation: Bug corrected . . . . .	93
Misc entries in the bibliography no longer produce a separate date . . . . .	33	\maketitle: Fixes topnum . . . . .	77
Typos fixed (Jamie Davis) . . . . .	33	General: Now we use purple color for links . . . . .	45
v1.50		Table captions for SIGCHI now use the same font size as figure captions (Luis Leiva) . . . . .	52
\@copyrightpermission: New copyright statements for iw3c2w3[g] . . . . .	74	Typo corrected (Zack Weinberg) . . . . .	39
v1.51		v1.56	
General: Corrected the bug with price suppression . . . . .	72	\@marginfigure: Added checking for description . . . . .	53
Suppress price if the copyright is set to iw3c2w3 or iw3c2w3g . . . . .	72	\@mkteasers: Added check for description . . . . .	92
		\Description: Added macro . . . . .	51
		\acksname: Added macro (Philip Quinn) . . . . .	107
		\ccsdesc@parse: End the concepts list with a period (Philip Quinn) . . . . .	71

\if@Description@present: Added macro	51	Moved page styles to \AtBeginDocument	99
\if@undescrbed@images: Added macro	51	standardpagestyle: Added logic for conference papers using journal format	96
General: Looks like XeTeX requires explicit monotype font declaration	50	Moved page styles to \AtBeginDocument	96
Make two-column layouts flush (Philip Quinn)	47		
v1.57		v1.60	
\ACM@origbaselinestretch: Added check whether the user changed \baselinestretch	109	\@headfootfont: Moved to footnotesize	96
\author: Added warning if \author has comma	64	v1.61	
\email: Added warning if \author has comma	66	\@typeset@author@bx: Added \normalbaselines	89
\if@ACM@balance: Added macro	35	v1.64	
\vspace: Added warning	109	\ACM@linecount@bx: Bug fix: made the spacing on the left and the right size equal	94
v1.58		\if@ACM@maketitle@typeset: Introduced macro	56
\@dblfloat: Deleted spurious \vspace warning	54	\maketitle: Added a switch setting to show that \maketitle is typeset	77
\@marginfigure: Deleted spurious \vspace warning	53	v1.65	
\@margintable: Deleted spurious \vspace warning	53	\@mkauthorsaddresses: Deleted cs@addpunct	91
\@mkbibcitation: Deleted spurious \vspace warning	93	v1.66	
\@printendtopmatter: Deleted spurious \vspace warning	93	\@specialsection: Suppress warnings about \vspace	80
\@sidebar: Deleted spurious \vspace warning	53	General: Patching algorithm and algorithm* to prevent spurious space warnings	51
\maketitle: Original \vspace inside \maketitle	77	v1.67	
\vspace: Preserved old versions as \vspace@orig and \vspace@orig	109	\@parfont: Deleted redefinitions of sections	102
General: Added HEALTH. TDSCI is renamed to TDS	56	\@specialsection: Paragraph inside group does not print its argument. Added a bugfix	80
Suppressed \addtocounter in pdf subject	45	General: Patching lstlisting and lstlisting* to prevent spurious space warnings	51
v1.59		v1.68	
\acmConference: Setting \ACM@journal@bibstrip	63	\@specialsection: Deleted grouping altogether	80
\acmJournal: Setting \ACM@journal@bibstrip	62	General: New command for unindent paras	101
\if@ACM@journal@bibstrip: Introduced macro	37	v1.69	
firstpagestyle: Added logic for conference papers using journal format	99	\@printendtopmatter: Deleted grouping	93
		\@specialsection: Changed dot to colon for sigplan	80

\ACM@linecountR: Do not increase numbers in one column format . . .	95	General: Patching minted and minted* to prevent spurious space warnings . . . . .	51
\ccsdesc@parse: Use math right arrow in text . . . . .	71	v1.74	
General: No dots for unindented paragraphs . . . . .	101	General: Changed the order of font loading . . . . .	50
v1.71		v1.75	
\l@subsubsection: Bug fixed (thanks to Andrew Black) . . . . .	44	\@ACM@checkaffil: Changed warning to error for country . . . . .	88
v1.72		\@beginmaketitlehook: Introduced macro . . . . .	77
\author: Added \detokenize (Kuldeep S. Meel) . . . . .	64	\@AtBeginMaketitle: Introduced macro . . . . .	77
\maketitle: Do not andify authors for pdf metadata (Scott Pakin) . . .	77	\maketitle: Added \@beginmaketitlehook . . . . .	77
General: Added hyperxmp . . . . .	44	v1.76	
v1.73		\author: Added code for orcid links . .	64
\@ACM@checkaffil: Added macro . . . .	88	\if@ACM@pbalance: Added macro . . . .	35
\@ACM@resetaffil: Added macro . . . .	88	\maketitle: Put \par inside group for keywords . . . . .	77
\@mkauthors@i: Check the presence of required elements for affiliations . . . . .	88	\@orcid: Added code for orcid links . .	66
\@mkauthors@iii: Check the presence of required elements for affiliations . . . . .	89	General: Moved before hyperref, see <a href="https://github.com/borisveytsman/acmart/issues/425">https://github.com/borisveytsman/acmart/issues/425</a> . . . . .	44
\@mkauthors@iv: Check the presence of required elements for affiliations . . . . .	90	standardpagestyle: Fixed bug with no line numbers for nonacm . . . . .	96
\city: Check the presence in affil . . .	85	v1.77	
\country: Check the presence in affil .	85	\@mkauthorsaddresses: New separator of institutions . . . . .	91
\if@ACM@citypresent: Added macro . . .	87	v1.78	
\if@ACM@countrypresent: Added macro . . . . .	87	\@mkauthors@i: Unboxing \mktitle@bx . . . . .	88
\if@ACM@instpresent: Added macro . . .	87	\@mkauthors@iii: Unboxing \mktitle@bx . . . . .	89
\institution: Check the presence in affil . . . . .	85	\@mkteasers: Unboxing \mktitle@bx . . .	92
\maketitle: Do not check again the presense of address fields . . . . .	77	\@printtopmatter: Added processing the overflowing title box . . . . .	81
		\@specialsection: Again suppressed \vspace warning . . . . .	80
